

net2phone Star Codes

Below you will find the most commonly used star codes for use on the net2phone network. These can be dialed manually from any desk phone, cordless phone, or 3rd Party soft phone client that is registered with the net2phone platform.

Phone Code	Operation / Feature
*21<extension>	Pick up any call ringing the target extensions
#2	Park an active call
*225<position number>	Retrieve a parked call from a specific position
*2<extension or off-net (outside) Number>	Places caller on hold and transfer call.
*95	Connect to voicemail message center
*95<extension>	Initiate a new call to another extension's voicemail
#3<extension>	Transfer an active call to another extension's voicemail
*22	Access the company directory
*85	Deactivate CallerID
*65	Re-activate CallerID
