

# A COMPLEX OPERATION

nexQuent Savento, as a team of specialists for archiving in the SAP® environment, has comprehensive project experience in the implementation of archive migrations. The resulting solution package includes not only consultancy services, but also flexible software tools, to ensure the efficient and safe realization of such projects in the individual customer-environment.

### ANALYSIS

### CONSULTING

### IMPLEMENTATION

nexQuent Savento's experts accompany you all the way, from the analysis of the current situation, throughout the implementation, and right through to the successful project completion.

An archive migration is an operation which should never be taken too lightly, and nexQuent Savento can offer you a safe and efficient solution for this task.

There may be a wide range of reasons for such an archive migration:

- ▼ Limited life cycle of systems
- ▼ Restricted or lack of support for software and hardware
- ▼ Increased maintenance costs for obsolete components
- ▼ Increasing demands on the performance and reliability of the archive system
- ▼ Cost savings resulting from reduced license and maintenance costs

The complexity of an archive migration depends, among other factors, on the following elements:

- ▼ Heterogeneous system scenarios with many potential sources of error
- ▼ Error incidents which may in the worst-case cause data loss
- ▼ Inconsistencies in the legacy archive system
- ▼ Provisions for customized archiving scenarios
- ▼ Requirements for a fallback scenario throughout the migration operation
- ▼ Strict compliance requirements, e.g. for audits
- ▼ Tight project time schedules despite large data volumes
- ▼ Implementation parallel to productive operation

# THE EFFICIENT AND SAFE SOLUTION

nexQuent Savento has developed a project solution named Savento Migration Suite for archive migrations which is based on SAP® standards. This employs multiple steps and can be implemented very quickly and easily in the individual customer environment.

Process steps and logging in the Savento Migration Suite:

## ADVANTAGES

The nexQuent Savento project solution offers the following advantages:

- ▼ Standard-based migration tools in the SAP® system for documents, print lists and ADK files (using ArchiveLink® function modules)
- ▼ Robust migration programs, e.g. restart option if jobs are aborted
- ▼ Ensuring the consistency and integrity of migrated documents by a comparison of the metadata and a comparison of the MD5 checksums
- ▼ Parallel running of migration jobs to reduce total run time of migration
- ▼ Simple job planning taking account of maintenance windows
- ▼ Observance of compliance requirements through detailed logging and documentation of the complete migration process

nexQuent Savento is your partner for professional and efficient archive migrations. We look forward to receiving your inquiries and will be pleased to offer you a detailed presentation of the project solution.
