

## How to: Apply a patch to the ESOPT database

- 1) Open SQL Management Studio and connect to the SQL Server.
- 2) If you were supplied a patch in a txt file, Rename the file to .sql
- 2) Open the .sql patch file in SQL Management studio.

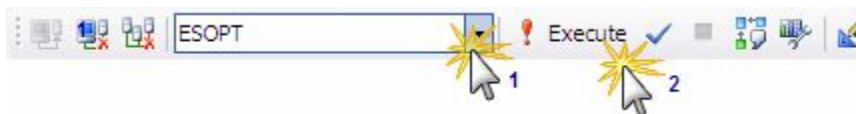

You may be asked to connect to the server again.

Click OK.

- 3) Using the Dropdown menu on the toolbar, select the ESOPT Database (default) or the database you are patching and click execute.

- 4) Repeat this process for all ESOPT databases.
