## Downloads

Software patches, BIOS updates, driver updates, and other miscellaneous software is available for most products. Follow the steps below for quick access to files for your system.

- 1 Enter** your serial, configuration, or model number above.
- 2 Save** the file you wish to download by clicking on the file name or download icon in the listing of available files.
- 3 Open** the downloaded file from your hard disk. Most of the download files are self-extracting archives and will extract themselves into the proper directories when opened. You may need a decompression program, such as PKZIP® or WinZip®, to open some files. Installation may vary, so check the installation instructions included with the file to ensure proper installation.

It should look like this.

If you are down loading many drivers please follow this:
