Hello, here is the actual set up of FPD on my website.

CONFIGURAT

Test

✔ OBTENEZ VOTRE DEVIS
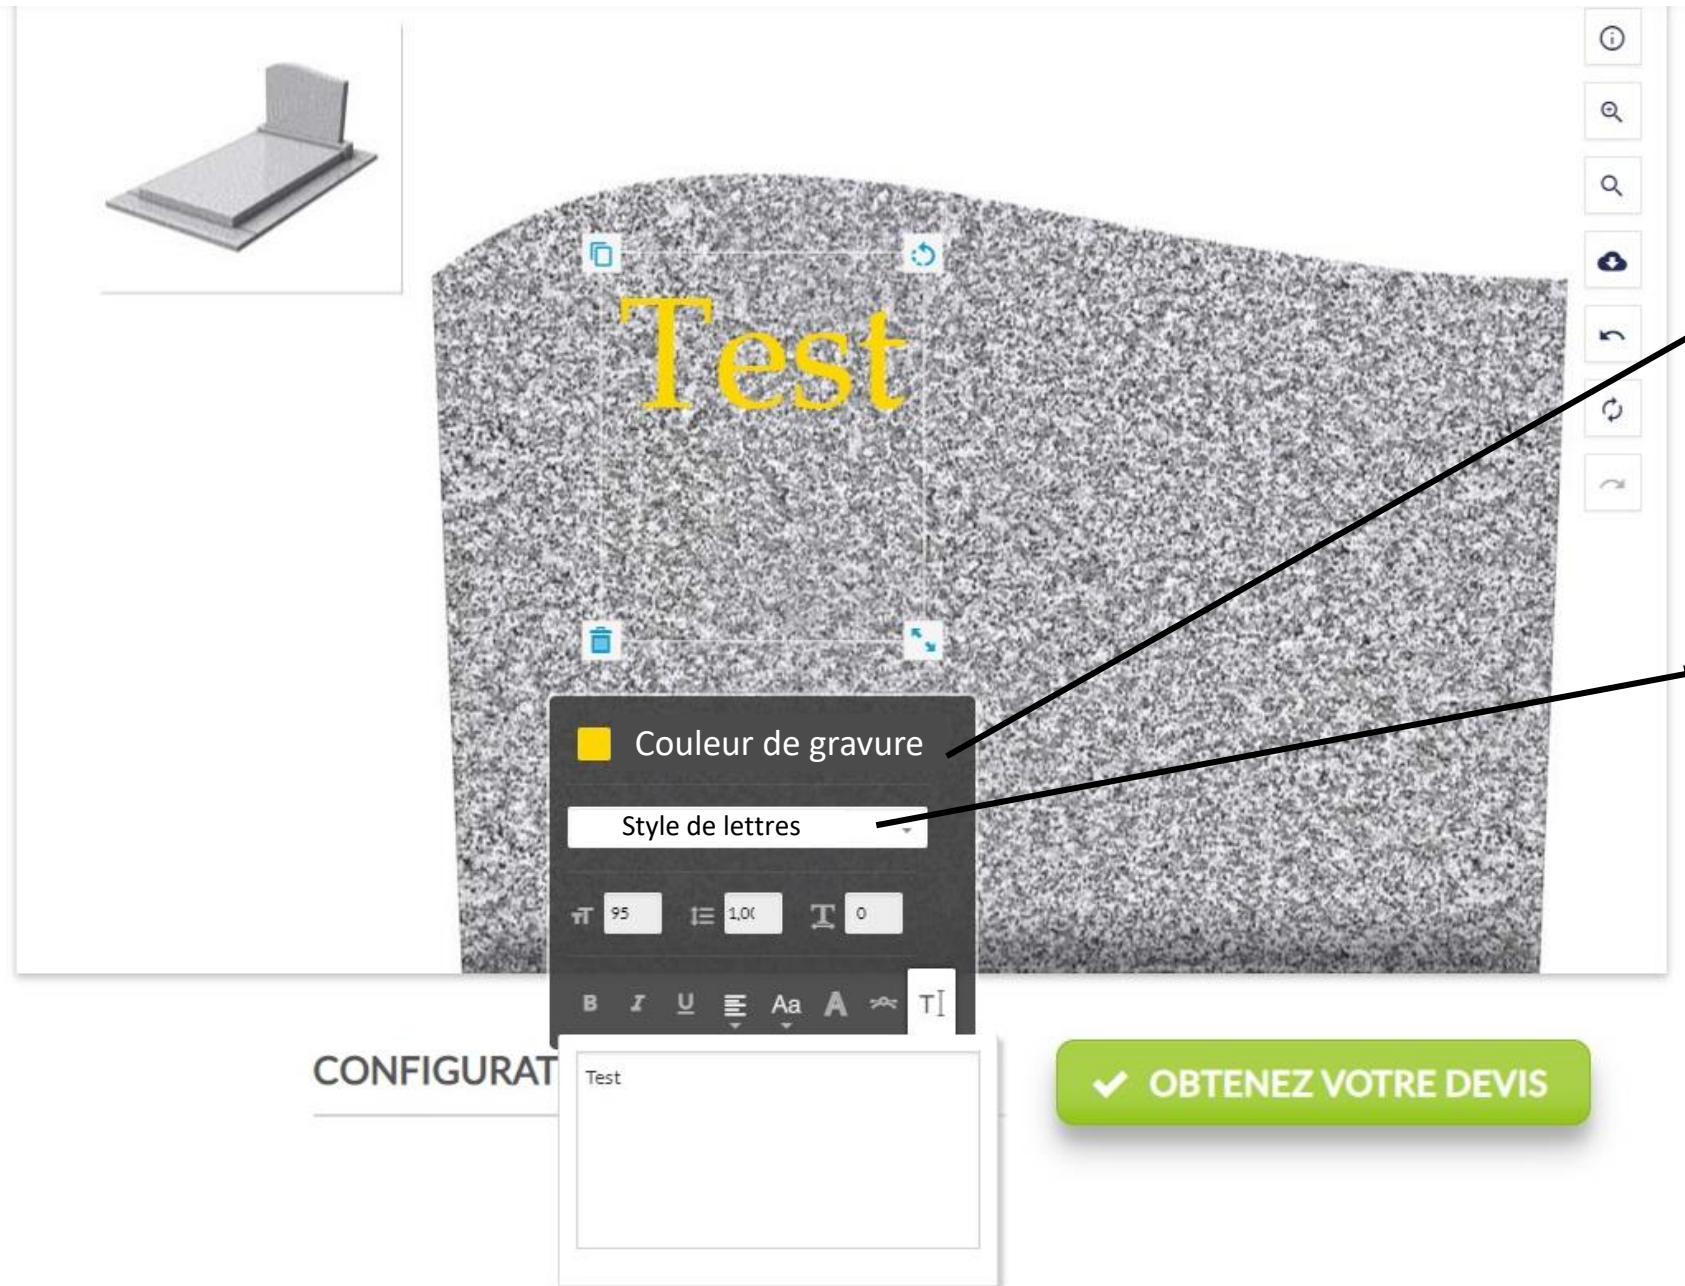

And here is what I need to achieve

I need my customers to easily find the way to **switch color like such of engravement**

I need my customers to easily switch **style of letters** among 5 fonts.

Important : fonts are common TTF files but I need to put custom titles for these font like :

Stick = 'arial',
English = 'Commercial Script',
Roman = 'time new roman',
Gothic = 'Gregorian',
Antique = 'Baskerville'

How can I achieve this?

Couleur de gravure

Style de lettres
