

Release Notes

Release 41 – Release Notes

Release published 17th May 2017

Organisation Portal – <https://org.tikforce.com>

- **Bug Fix:** An issue with users being unable to scroll tables on mobile phone screens has been fixed.
- **Bug Fix:** The back button not allowing users to return to the dashboard on the Advanced Workers Search page has been fixed.
- **Bug Fix:** When creating a new Worker Relationship, users are now prevented from selecting inactive relationship types.

TikForce Positions – <https://app.WorkReady.jobs>

- **Bug Fix:** An issue with a mobile number not loading on the PDF smart collector has been fixed.
- **Bug Fix:** An issue with Stripe payment exception handling was found and fixed. Exceptions related to insufficient funds, invalid dates, and all other Stripe-based exceptions that can stop payments, are now handled with appropriate error messages displayed.

Tik.me Portal - <https://app.tik.me>

- **Enhancement:** A user can now purchase a résumé extract, which will download a résumé as a PDF document. The user has to pay each time they wish to download the résumé.

This enhancement can be accessed at the Tik.me app via the résumé page. A credit card payment takes place and the résumé extract is downloaded.

- **Bug Fix:** An issue with mobile users being unable to edit referee details for their Tik.me profile on a mobile phone screen has been fixed.
- **Bug Fix:** Address fields in Tik.me now have maximum length limits imposed to stop a user from entering more characters than they should.

Verification Portal - <https://verify.tikforce.com>

- **Enhancement:** The front page of the Verify site now has a widget displaying the total number of unverified and verified workers within an entity.

Entity Managers who are verifiers for more than one entity will be able to see the numbers for any of the entities after selecting an entity from a dropdown list.

Users who are verifiers for a single entity will be able to see the numbers for that entity only.

Core Functionality

- No Changes

CDN - <https://cdn.tik.me>

- No changes

MTM ID Site - <https://id.tik.me>
