

Release 42 – Release Notes

Release published 31st May 2017

Organisation Portal – <https://org.tikforce.com>

- **Enhancement:** For users who have access to more than one organisation, organisations are now ordered alphabetically in the user account dropdown list on the top right hand corner of the page.
- **Enhancement:** An Updated Certificate of Verification is available for use by entity managers.

The updated Certificate can be accessed from the organisation portal at:

Positions > Manage Positions > View Details > Manage Workers for Position > Certificate (for the workers who are members of that organisation and are verified).

- **Enhancement:** UI and UX improvements have been introduced throughout the Organisation Portal. Navigation has been updated, tables have been improved, and contextual panel titles added for prominent actions like creating, editing or deleting.
- **Bug Fix:** When editing worker relationships, an issue where the dates wouldn't be updated properly has been fixed. An issue where previous relationship dates were not being updated when editing a worker relationship has also been fixed.
- **Bug Fix:** An issue with the Credential Verification Requests list not being ordered by date was fixed. They now display the oldest first.
- **Bug Fix:** An issue with incorrect alignment of entities on the Associated Organisations page on a mobile device was fixed.

Tik.me Portal - <https://app.tik.me>

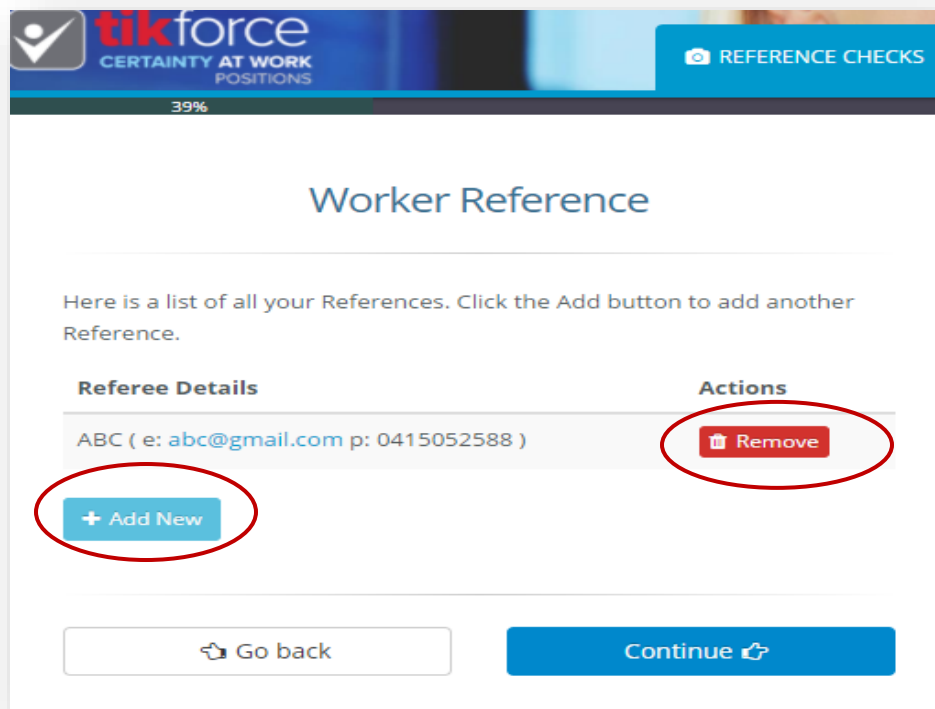

- **New Feature:** Online Credential Recognition in the API now processes images with filters to obtain a more accurate result.
- **New Feature:** Police Check Certificates can now be downloaded by users from the user's credentials page.

An email is sent to the user when a police check is ready for download.

- **Enhancement:** The accordion effect on the mobile dashboard of app.tik.me has been carried over to the desktop dashboard. Each section can now be opened and closed by clicking on the section's title.
- **Bug Fix:** An issue with the automated processing of expired credentials was fixed. The process has been updated to prevent the creation of invalid credential verifications.
- **Bug Fix:** An issue with the mobile dashboard of app.tik.me not updating and showing details when a detail is changed has been fixed.
- **Bug Fix:** An issue with incorrect alignment of Work History on the Tik.me Dashboard was fixed.

TikForce Positions – <https://app.WorkReady.jobs>

- **Enhancement:** A new smart collector for references has been implemented in TikForce Positions. It loads the referees list from the user's profile and users can then add or remove referees in the smart collector.

To Add A Referee:

- Click on "Add New" and a details form comes up where the user can add Referee details including Referee Name, Company Name, Relationship, Email Address, and Mobile Phone Number.

To Remove A Referee:

- Click on the Remove button to delete a referee from the list.
- **Enhancement:** All references to WorkReady.jobs have been changed to TikForce Positions in the email templates.

Verification Portal - <https://verify.tikforce.com>

- No Changes
