

Release 43 – Release Notes

Release published 2nd June 2017

Tik.me Portal - <https://app.tik.me>

- **New Feature:** Users now have the option to use any photos taken for them using the credential Powerapp when uploading images for their credentials on Tik.me Portal.
- **Enhancement:** Bio details truncates near the end of the page in the resume pdf, with a link back to the resume to view.
- **Bug Fix:** Users can no longer give a referee a phone number that is the same as one of their own.
- **Bug Fix:** Preferred Phone and Mobile phone only display in resume pdf if they have values, they won't display at all if they are blank.

Organisation Portal – <https://org.tikforce.com>

- **Bug Fix:** User cannot re share a position that is already shared, if the worker has already initiated the position.
- **Bug Fix:** An issue with Last name not appearing on the certificate of verification was fixed
- **Bug Fix:** In an Organisation, when managing shared emails for a position, dates and time are now set to the user's local time.

TikForce Positions – <https://app.WorkReady.jobs>

- **New Feature:** A new page was created in TikForce positions to allow a user to start or continue a TikForce Position using a code instead of an email address and password.
- **New Feature:** A position can now be classified as “PostVerify”. If a position has “PostVerify” as true, the user can complete the position requirements and then have their identity verified by a third party.

The user will have an option to choose their ID Photo from photos taken of them using the ID Photo PowerApp.

- **New Feature:** When a user has to add a credential in a TikForce Position, they now have an option to use any photos taken for them using the Credential PowerApp.
- **Bug Fix:** An issue with the TikForce logo not displaying on the spinner when uploading a document in the greenID Verification process was fixed.

Verification Portal - <https://verify.tikforce.com>

- No Changes
