

Release 46 – Release Notes

Release published 5th July 2017

Organisation Portal – <https://org.tikforce.com>

- **New Feature:** Organisation Portal users now have access to the “Add & Allocate” screen and the “Manage Share Codes” screen.

This new feature can be accessed from the Workers menu item from the main menu. This will add and allocate new users to a position but will not verify them.

- **New Feature:** A manager of a supplier can “batch message” all workers assigned to a position.

This feature can be accessed from Positions > Allocated Positions > Manage Workers > Notify All Workers,
or
Suppliers > Manage Suppliers > View Details > View Workers > Notify All Workers.

- **New Feature:** It is now possible for a manager to see all his workers for an allocated TikForce Position.

This new feature can be accessed from the following page:

Positions > Allocated Positions > Manage Workers

In addition, a Manager will be able to see all verified workers for the allocated Tikforce Position from all suppliers (and sub-suppliers further down the Organisation hierarchy) associated with that TikForce Position when they view the position’s worker list.

- **New Feature:** Suppliers can now be assigned to a Position on the Positions > Allocated Positions page.
- **New Feature:** Positions can now be assigned to Suppliers on the Suppliers/Manage Suppliers page.
- **New Feature:** Manager is now able to “De-allocate” a position from an immediate supplier.

This feature is accessible from org portal at:

Main menu > Suppliers > Manage Suppliers > View Details > Deallocate Position

Once the position is deallocated the position is removed from the Allocated Positions for that supplier.

also

Any invites to that position from that supplier are removed.

and

For users related to the Supplier that have started the Position, the position is cancelled, unless that user has been also assigned the position from another supplier/entity.

Tik.me Portal - <https://app.tik.me>

- **Bug Fix:** An issue with entering a postcode for the Northern Territory (which start with zero) while doing a police check has been fixed.
- **Bug Fix:** An issue with the Fresh Desk chat popup obscuring other elements on some pages was fixed.

Tikforce Positions – <https://app.WorkReady.jobs>

- **Bug Fix:** In the streamlined NPC position, error messages now show in the correct places.
- **Bug Fix:** An issue with a user's progress being lost when timing out in the streamlined NPC has been fixed.

Verification Portal - <https://verify.tikforce.com>

- **Enhancement:** “Verification Only” is no longer an option when verifying workers in Verification Portal.
- **Enhancement:** New help content has been added to the verify site.

The following slugs have been created:

Slug	Function
