

Release 48 – Release Notes

Release published 18th July 2017

Organisation Portal – <https://org.tikforce.com>

- **Enhancement:** An issue with a user getting validation errors when signing up for a shared position with a different email address has been fixed. Now a user with an invitation from an organisation cannot change their email address during registration.
- **Enhancement:** The links to switch between the different sites have now been moved into the user dropdown menu on top right in all sites except tik.me.
- **Enhancement:** If a user has access to more than one organisation, the method for switching between organisations has been changed. A new menu item “Associated Organisations” in the user dropdown menu at the top right takes the user to the page displaying tiles for each organisation to which the user has access. This page has a filter added, which helps refine the list of tiles displayed.

In addition, the current organisation name displayed at the top of the page will become a dropdown list if the user has access to more than one organisation. There have also been a few user interface updates to handle display on different devices.

This enhancement can be accessed by clicking on the drop-down menu icon next to the organisation’s name on the top left (highlighted in red in the screenshot above)

- **Bug Fix:** An issue with Entity Managers being able to click on the Active/Inactive links in the Manage Positions page has been fixed. This functionality is only meant to be used by Admin users, and the page now displays only a status label if the user is not an Admin. This fix can be accessed at

Positions > Manage Positions > Status

- **Bug Fix:** The Signup page for a shared position now correctly shows the applicable styling for that position.
- **Bug Fix:** An issue with the page numbers in the worker certificate has been fixed.
- **Bug Fix:** An issue with the user's profile photo ratio has been fixed.
- **Bug Fix:** When a position is deleted in the organisation portal, a record of it is retained in the database.
- **Bug Fix:** Only active positions are displayed in the Add Pre-Verified users' area. This fix can be accessed at:

Main Menu > Workers > Add & Allocate Workers > Position

TikForce Positions – <https://app.WorkReady.jobs>

- **Enhancement:** Inactive positions now show an "Inactive Position" Page if the position is inactive, similar to an Access Denied Page.
- **Bug Fix:** In the Streamlined NPC, users can now go back and finish the ID verification form at any point in the process correctly.

Tik.me Portal - <https://app.tik.me>

- **Bug Fix:** Credential Cards will now display the Verification and Validation Status (e.g. expiring soon if the credential is about to expire) in the text at the bottom of the card.

Verification Portal - <https://verify.tikforce.com>

- No Changes

MTM ID Site - <https://id.tik.me>

- No changes
