

Release 56 – Release Notes

Release Published 27th Sep 2017

Organisation Portal (Org) – <https://org.tikforce.com>

Bug Fix: An issue with a worker completing a Post Verify Position, but the email not being sent to the Verifiers was fixed

Bug Fix: An issue with Entity Worker Relationships was fixed. When creating a relationship for a set of workers, all the relationships are now created, and the dates are added correctly.

Bug Fix: An issue with Export to CSV functionality in tables was fixed so all the data is exported, instead of just the first page. This affects the following tables in the following pages:

• Content	• Positions > Allocated Positions
• Entity Worker Relationships	• Positions > Manage Positions
• Dashboard > Expiring Credentials	• Positions > Manage Positions > Details > Assign Position
• Dashboard > Expired Credentials	• Positions > Manage Positions > Details > Manage Identity Checks
• Associations > Manage Suppliers	• Positions > Manage Positions > Details > Manage ID Card Numbers
• Associations > Manage Suppliers > Details	• Positions > Manage Positions > Details > Assign ID Card Numbers
• Associations > Manage Suppliers > Details > View Workers	• Positions > Manage Positions > Details > Share Position
• Workers > Manage Workers	• Positions > Manage Positions > Details > Manage Workers
• Workers > Manage Workers->Details	• Positions > Manage Positions > Details > Manage Shared Emails
• Workers->Manage Invites	• Positions > Allocated Positions > Details > Manage Allocated Workers
• Workers Verification Status	• Dashboard > View Full Timeline

Tik.me Portal- <https://app.tik.me>

Bug Fix: Résumés no longer show a user's referees, and displays their email address under the Profile section.

Bug Fix: When a user uploads an existing résumé, if they already have an address or phone number in the system, those import options will no longer be available to them.

Bug Fix: When a user uploads a résumé, issues with duplicated phone numbers in fields have been fixed.

Bug Fix: When searching for positions, the names of workers who match the search criteria are no longer displayed.

TikForce Positions- <https://app.Workready.jobs>

Bug Fix: When a user submits an incorrect file type for the external link smart collector, a more understandable error message is now given.

Bug Fix: An issue with long position titles breaking the layout was fixed. The layout will now truncate the text if the title is too long.

Verification Portal - <https://verify.tikforce.com>

Enhancement: A checkbox has been added to the Verify Worker page in Verify, to toggle the sending of the notification email to the worker. When checked it will send the email to the worker, when not checked, it will not send the email to the worker

This enhancement can be accessed at Verify -> Verify Users -> Verify Identity

MTM ID Site - <https://id.tik.me>

No changes
