

FREEDOM 7 SHARK SHIELD™ FOR BOATING

SWIM SAFELY NEXT TO YOUR BOAT

The Freedom 7 Shark Shields™ conventional use is for swimming, snorkeling, spear fishing, scuba diving and kayaking. However, it can also be deployed aft from a boat by a tether approximately three meters long and hanging under a polystyrene buoy by another one meter tether attached to the power module.

The deployment of one or two Freedom 7 Shark Shields™ creates a 'Safe Zone' at the rear of the boat to allow swimming off the duckboard. Freedom 7 Shark Shields™ can also be used to protect your prize catch by deploying it over the transom. Most fish are taken on or near the surface of the water close to the boat.

The Freedom 7 can also be used as per its original design as a personal unit attached to the users lower leg. This allows excursions away from the boat. The multi purpose uses for this product makes for an ideal inclusion in your boats accessories.

'Peace of mind for you and your loved ones'
