

TikForce Platform Release Notes

Organisation Portal

Enhancements

The following enhancements to existing functionality have been added to the Organisation Portal:

- The Active Exempt Credential Groups page is now the Active Exemptions page. It shows both credential groups that have been exempted, and positions that have been exempt in separate tables.
- The Public Profile link in the Worker Details page in the Org Portal has been hidden until there is a more relevant use for it.

This enhancement can be accessed at **Org Portal > Manage Workers > Worker Details**.

- When adding a new Credential Group Exemptor to your organisation, an agile tag will be created.

This enhancement can be accessed at **Org Portal > Positions > Manage Exemptors > Create New Credential Group Exemptor**

- An Org Manager or Org Admin can see "English" as a default language in Language dropdown list on "Create Content" page.

This enhancement can be accessed at **Org Portal > Click Content > Click Create Content**

- The Last Modified Date was added to the Position and Allocated Position Details pages.
- The Organisation Select dropdown has been removed from the Add & Assign page in the Organisation Portal. The system will now automatically detect if the user and selected entity are designated Verifiers, and only show the Add & Assign link based on that and the currently selected Entity in the Org site.

This enhancement can be accessed at **Org Portal > Manage Workers > Add & Assign**

Bug Fixes

The following bugs have been fixed to the Organisation Portal:

- An issue where the Private column on the View Positions Page was showing incorrect data when a user went back to it via the back function in their web browser has been fixed.

- An issue when a user resent an invitation to a removed worker was showing a success notification instead of an error has been fixed.
- An issue with the Workers Required field displaying incorrectly was fixed. There have also been some other User Interface enhancements to the Projects pages in the Org Portal.

TikForce Positions Application

Bug Fixes

The following bugs have been fixed to the TikForce Positions Application:

- An issue with the Positions Home Page not displaying correctly on mobile devices was fixed.
- An issue with success notifications being shown to people failing a portion of the TikForce Id Verification has been fixed.
- An issue with success notifications not appearing when a user pays for a streamlined National Police Check (NPC) has been fixed.
- An issue with the consent text for NPCs going out of view if a user enters a wrong verification code in Firefox was fixed.

This issue can be found on any NPC Position while using the FireFox browser.

Core System

Enhancements

The following enhancements to existing functionality have been added to the Core System:

- The standard error pages have been updated with the new logos and background images. An issue with the back link not working was also fixed.
