

## TikForce Platform Release Notes

Release R74

Released: 26<sup>th</sup> April 2018

## Organisation Portal

### New Features

The following new features have been added to the Organisation Portal:

- A new feature has been added to the system to allow Organisation Managers and Admins to manage Organisation Credentials.

The updated Profile page now has a section for Organisation Credentials. Managers or Admins can now Add, Edit, Remove, View, and Request Verification for any of these credentials.

This new feature can be accessed at [org.tikforce.com/profile/index](https://org.tikforce.com/profile/index)

- A new feature has been added to the system to run dynamic reports as a background task.

When the Dynamic Report Report has finished running, then the user will receive an email informing the user they can access the report results.

This new feature can be accessed at Organisation portal > Workers > Reports > Run Report and Organisation portal > Positions > Reports > Run Report and Organisation portal > Associations > Reports > Run Report

**Known Issue:** Download Report link sent in the email takes user to " My Reports" page from where user has to click download report button again to actually download the report.

- A new feature has been added to the system to view an Organisation's Credentials when that organisation acts as a supplier to your organisation.

This new feature can be accessed at the Organisation Portal > Associations > Suppliers > Details > Entity Credentials

### Enhancements

The following enhancements to existing functionality have been added to the Organisation Portal:

- An enhancement has been added to the system to improve the UI and UX of running reports.

When a user chooses to run a report now it will first give them the option of selecting a custom name for the report while adding the report parameters.

It will then redirect to a new page called My Reports which will display a table of all the reports run by the user. These reports will have a status of either In Progress or Complete.

The complete reports will have 2 options available to the user to either view and download the first 500 records of the report, or to download the full report.

Every time a report is completed the user will be notified via email with a download link to the report.

- An enhancement has been added to the system to add a description for your "organisation profile".

This enhancement can be accessed at Org Portal > View Organisation Profile > Edit

- An enhancement has been added to the system to allow managers to edit a description for their "Organisation".

This enhancement can be accessed at the Organisation portal > View Profile > Edit

- Whenever a worker is assigned a position, the organisation addressing them in the email sent to their inbox will be the organisation that assigned them, instead of the owner of the position.

- An enhancement has been added to the system to improve the Search feature in the Organisation Portal. The search will now return Positions and Organisations along with the Workers.

- An enhancement has been added to the system to allow Organisation Managers to view Organisation Credentials for their Supplier's and their Suppliers.

This enhancement can be accessed at **Associations > Manage Suppliers > View Details.**

- Org Managers/Admins are now able to request an exemption for a position owned by their organisations.

## Bug Fixes

The following bugs have been fixed to the Organisation Portal:

- An issue where pending assessments for workers in Suppliers weren't showing for Assessors has been fixed.
- An issue with Organisation managers and Admins not having permission to create projects was fixed.

## TikForce Positions Application

### New Features

The following new features have been added to the TikForce Positions Application:

- A new feature has been added to the system to show users completing a National Police Check position information about which Organisations will get access to their police check results and data.

This new feature can be accessed at the declaration page of any National Police Check position when relevant.

### Enhancements

The following enhancements to existing functionality have been added to the TikForce Positions Application:

- An enhancement has been added to the system to improve the consistency of the wording between all NPC positions both streamlined and as part of a smart collector.

This enhancement can be accessed at any TikForce Position with a NPC requirement.

- An enhancement has been added to the system to upgrade the Positions site to meet W3C Accessibility standards.

### Bug Fixes

The following bugs have been fixed to the TikForce Positions Application:

- An issue with facial recognition in the Primary Documents page in the ID Verification has been fixed.
- An issue with poor performance on the positions portal was fixed.

## TikMe Application

### Enhancements

The following enhancements to existing functionality have been added to the TikMe Application:

- An enhancement has been added to the system to upgrade the Tik.me site to meet current W3C Accessibility standards.

## Verification Portal

### New Features

The following new features have been added to the Verification Portal:

- A new feature has been added to the system to give a clear visual indication to Sys Admins where a function or link is only for use by Sys Admins.

This new feature will be visible on the Side Menu of the Admin Portal, and where there are Sys Admin only links in other areas.

### Enhancements

The following enhancements to existing functionality have been added to the Verification Portal:

- An enhancement has been added to the system to improve the layout of the Entity Profile in the Organisation Portal. This new layout will be scalable to include all new functions related to Entities, this includes Entity Credentials to begin with.

This enhancement can be accessed at [org.tikforce.com/profile/index](https://org.tikforce.com/profile/index)

### Bug Fixes

The following bugs have been fixed to the Verification Portal:

- When an Admin tries to verify a credential with no verification status, Admin views success instead of error.

## Single Sign On System

No changes were made to the Single Sign On System.
