

NG A360 DHIS2 Configuration

Isaiah Nyabuto, Bram PIOT

12/18/2019

Model

The chosen design was that of a single event data model, rather than using the Tracker model. ¹While being more powerful in terms of analytics and client tracking, the Tracker approach would result in cumbersome and error-prone mobile data entry and more complex analytics and is generally less stable than the “single event” approach.

¹ See the differences between a Tracker and a single events data model

Overview

The set up complements the program design where:

- The mobilisation of the unmarried girls (9ja girls) is tracked on separate sheet; 9ja Girls Community Mobilization.
- The married girls (MMA) mobilization by Male IPCA is recorded on a separate sheet; Male IPCA Mobilization.
- The clients registration, attendance and service provision sheets are recorded in the Attendance and Service Log.

Programs

There are three single events programs:²

1. NG RH A360 – 9ja Girls Community Mobilization
2. NG RH A360 – Male IPCA Session Attendance Sheets
3. NG RH A360 – Attendance and Service Log

Program Details

NG RH A360 - 9JA GIRLS COMMUNITY MOBILIZATION tracks clients mobilization and referral information for unmarried or 9ja girls. It consists of three sections:

1. **Mobilizer** that records details about the mobilizer.
2. **One-on-One Session** that captures the number of clients reached through a one on one session.
3. **Group Session** that stores information about clients reached in a group session.

Figure 2: NG RH A360 - 9ja Girls Community Mobilization

NG RH A360 - MALE IPCA SESSION ATTENDANCE SHEETS tracks clients mobilization and referral information for the married or 9ja girls. It consists of two sections:

1. **Male IPCA** that records details about the mobilizer.
2. **Daily Total Reached** that captures a summary of the mobilization.

NG RH A360 - ATTENDANCE AND SERVICE LOG tracks the registration, attendance and service provision sheets for all the clients. It consists of four sections:

1. **Registration** that records details about the girl, including the program attended, referral details, and the name of the mobilizer.
2. **Mentorship Attendance** that records the mentorship classes attended by the married girls
3. **9ja Girl Attendance** specifically for the unmarried girls, an entry point for service provision.
4. **Service Provision** that records the services issued by a provider, including the type of visit, method removed, and date of follow up visit.

Sharing Settings

The set-up is shared to:

- **NG - A360 Admins** with rights to edit, capture and view data from all NG A360 programs.
- **NG - A360 Users** with rights to view and capture data from all NG A360 programs.

Additional sharing is provided for the 9ja mobilizers and Male IPCA to enable access to the mobilization programs.

- **NG - 9ja Mobilizers** with rights to capture and view 9ja girl's community mobilization.
- **NG - A360 Male IPCAs** with rights to capture and view Male IPCA session attendance sheets.

Program Rules

The programs implement two types of program rules:³

1. **Validation patterns** to affirm that the data is correct, consistent, and of the right quality.
2. **Escape patterns** to hide and switch between different sections for easy navigation on the forms.

Sharing settings allows users to view or edit the metadata or data in DHIS2. They provide access to members belonging to a user-group where the metadata or data are shared.
