

Section 508 VPAT

VPAT: Voluntary Product Accessibility Template (version 1.3)

Date: 6/30/2015

Product(s): Authentic8 SILO

For more information, contact: support@authentic8.com

[Accessibility](#) is the concept that technology should be designed and developed to be usable by and, as much as possible, convenient for people with disabilities. [Section 508](#) of the United States Rehabilitation Act of 1973, as amended by the Workforce Reinvestment Act of 1998, defines a set of technical requirements for evaluating a product's accessibility. Authentic8 endeavors to make its products accessible. This voluntary, non-legally binding, product self-assessment is provided to help describe the accessibility of Authentic8's products.

Summary

Criteria	Supporting Features	Remarks and explanations
Section 1194.21 Software Applications and Operating Systems	Supported with explanations	
Section 1194.22 Web-based Internet Information and Applications	Not applicable	Authentic8 SILO is not a product of this type.
Section 1194.23 Telecommunications Products	Not applicable	Authentic8 SILO is not a product of this type.
Section 1194.24 Video and Multi-media Products	Not applicable	Authentic8 SILO is not a product of this type.
Section 1194.25 Self-Contained, Closed Products	Not applicable	Authentic8 SILO is not a product of this type.
Section 1194.26 Desktop and Portable Computers	Not applicable	Authentic8 SILO is not a product of this type.
Section 1194.31 Functional Performance Criteria	Supported with explanations	
Section 1194.41 Information, Documentation and Support	Supported	

Section 1194.21 Software Applications and Operating Systems

Criteria	Windows	OS X	iOS	Linux	Remarks and Explanations				
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Supported with explanations	Supported with explanations	Supported with explanations	Supported with explanations	After enabling Mouse Keys in Control Panel, all aspects of the application can be accessed with the keyboard.				
					When using on-screen system builtin virtual keyboard, the keyboard shortcuts support is provided via the visual buttons representing major modifier keys on the accessory bar.			iOS	
					When keyboard auto-activation is turned off, user should use two-finger tap to connect to either on-screen keyboard or external physical keyboard.			iOS	
					Media keys on external physical keyboard are not used to control the media playback in SILO session.			iOS	
					After enabling Num Pad Mouse in Xorg, all aspects of the application can be accessed with the keyboard.				

Section 508 VPAT

Criteria	Windows	OS X	iOS	Linux	Remarks and Explanations			iOS	
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Supported with explanations	Supported with explanations	Supported with explanations	Supported with explanations	Visual format of audio/sound information is not supported.				
(c) A well defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Not supported	Not supported	Not supported	Not supported	The information conveyed is not available in a format suitable for Assistive Technology.			iOS	
(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.	Not supported	Not supported	Not supported	Not supported	The information conveyed is not available in a format suitable for Assistive Technology.			iOS	

Section 508 VPAT

Criteria	Windows	OS X	iOS	Linux	Remarks and Explanations				
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Supported	Supported	Supported	Supported				iOS	
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Not supported	Not supported	Not supported	Not supported	Except caption titles, the information conveyed is not available in a format suitable for Assistive Technology.			iOS	
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Not supported	Supported	Supported	Not supported	The user color and contrast settings defined in the operating system are not used by the application.				
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Not applicable	Not applicable	Not applicable	Not applicable	Minimal animation is used in the application. Visual activity indicators are provided with textual information to indicate the connection and upload/download progress.			iOS	
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Supported	Supported	Supported	Supported				iOS	
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Supported	Supported	Supported	Supported				iOS	

Section 508 VPAT

Criteria	Windows	OS X	iOS	Linux	Remarks and Explanations			iOS	
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Supported with explanations	Supported with explanations	Supported with explanations	Supported with explanations	Application does not utilize flashing or blinking text, objects, or other elements; however, it also does not prevent 3rd party websites from flashing or blinking with frequency greater than 2 Hz or lower than 55 Hz.			iOS	
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Not supported	Not supported	Not supported	Not supported	The information conveyed is not available in a format suitable for Assistive Technology.			iOS	

Section 1194.31 Functional Performance Criteria

Criteria	Supporting Features	Remarks and Explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Not supported	Authentic8's products do not provide sufficient support for Assistive Technology to facilitate a blind or visually impaired person.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Supported	
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	Not applicable	Authentic8's products do not require hearing to operate. Authentic8's products do not support audio.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Not applicable	Authentic8's products do not support audio.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	Not applicable	Authentic8's products do not require speech to operate. Authentic8's products do not support audio.
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Supported	

Section 1194.41 Information, Documentation and Support

Criteria	Supporting Features	Remarks and Explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	Supported	
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supported	You can find this document and additional information about Authentic8 products & releases at https://support.authentic8.com
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supported
