

1. From your personal account, tap the settings icon, then scroll to Account > Switch to Business Profile.

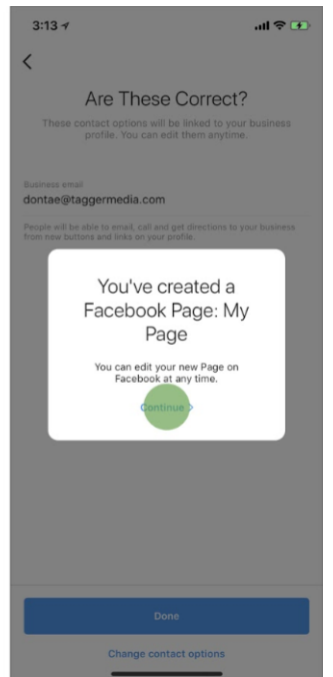

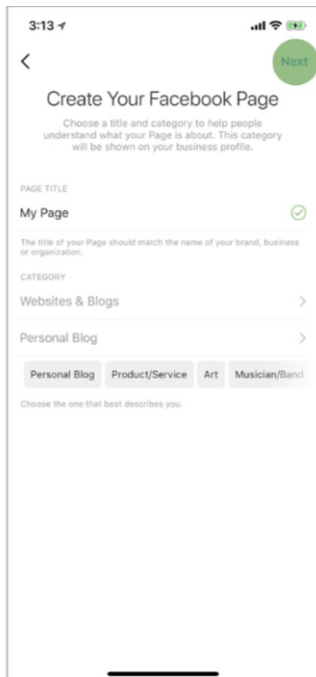

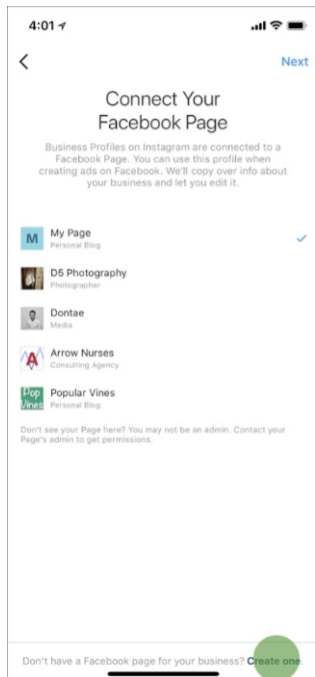

2. Tap through the next few screens.

3. All Business profiles must be connected to a corresponding Facebook page. Connect & choose an existing page. Confirm your contact info.

4. If you do not have an existing page, it's easy to create one from Instagram. Select "Create one". Type the desired name of your page and select the category.

5. Click “go to profile” to be directed to your page. Here you can change your Facebook settings & visibility for the page.
