

# GD-50 USB Setup

## Windows

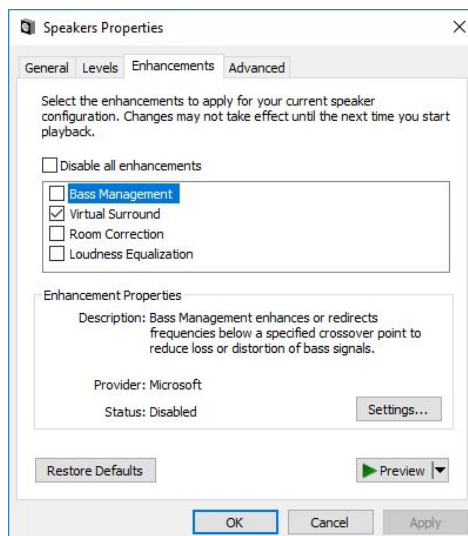

1. Drivers should auto install upon plugging in the device
2. To enable virtual surround sounds, right click the sound icon on your taskbar

3. Select Playback Devices
4. Locate "Speakers USB Audio Device"

5. Select the device and select "Properties"
6. Select Enhancements on the top
7. Click enable Virtual Surround

## Notes

- **We suggest testing the effect with this video**
