14/06/2018	56	55	494	125	40.65	177	3.96	Edit	Delete	Grass Wedge

- Log into www.pbi.ie
- Click on 'Grass Cover/Wedge' on the left hand menu
- Click on 'Import Covers' (top of the screen)
- Here you will be asked to enter the cover date and you will be able to browse for your file containing the paddocks and covers.

Add New Jenquip Cover

Measurement Date*

Select File*

This is designed to import a CSV file generated by the Jenquip EC 09 and EC 10. The first Column must have the Paddock Code from the PBI Application. The fourth column must have the Cover Measurement for the Paddock. If zero is entered the entry is not uploaded.

CANCEL

CONTINUE

- Click on 'Browse', select your file and click on 'Continue'
- Your details are now uploading; this **will take a few seconds** depending on the number of paddocks on the farm.

Notes

The **Paddock Code** should be in the **first column**

The **Cover** for each paddock should be in the **fourth column**

If the **Paddock Code** does **not exist** on PBI it will not be uploaded

If the paddock is in the status Grass the **maximum cover is 3,500kg DM/ha** for farms using 'available covers' and **5,000kg DM/ha** for farms using 'total covers'

The covers calculated using **the EC09 and EC10** are '**total cover**', if you are set up as using 'available cover' on PBI we will **deduct 1,500kg DM/ha** from each cover.
