

PC*MILER 34 Default Road Speeds

PC*MILER's default road speeds are used to calculate a route's drive time unless traffic data is applied, custom speeds are specified or a governor maximum speed is enabled. *(An add-on license is necessary to take advantage of traffic data.)*

To find the default road speeds for a certain jurisdiction:

1. Locate a state or country in the **Road Speed Category by Jurisdiction** table below, and note its **Road Speed Category**.
2. Match the category to the following **Default Speeds by Road Class** table.

Default Speeds by Road Class

Speeds are listed in mph.

Road Speed Category	Vehicle Type	PC*MILER Road Class														
		Interstate Highway		Divided Highway		Primary Highway		Secondary Highway		Local		Ferries	Ramps		Sub-Local	Pathway
		Rural	Urban	Rural	Urban	Rural	Urban	Rural	Urban	Rural	Urban	Rural/Urban	Rural	Urban	Rural/Urban	Rural/Urban
All Urban	Truck	50	50	30	25	25	20	20	11	15	7	18	25	20	5	3
Very Slow	Truck	55	50	35	25	30	20	25	11	20	7	18	25	20	5	3
Slow	Truck	55	50	40	25	35	20	25	11	23	7	18	25	20	5	3
Average	Truck	57	50	45	25	40	20	30	11	25	7	18	25	20	5	3
Fast	Truck	60	50	50	25	45	20	35	11	27	7	18	25	20	5	3
Very Fast	Truck	60	50	55	25	50	20	40	11	30	7	18	25	20	5	3

Road Class Definitions

Road Class	Description
Interstate Highway	<ul style="list-style-type: none"> • The primary function of these roads is to move high volumes of vehicular traffic over medium to long distances at high speeds • Can be accessed only via access ramps
Divided Highway	<ul style="list-style-type: none"> • Major arteries that move heavy volumes of traffic at moderate speeds • Can be limited access in some areas but may also offer access from local roads • Usually have a barrier or median that prevents movement between lanes of opposing traffic • Medians may have crossovers that are part of the normal traffic pattern • Left turns are often restricted, both off of the highway and onto the highway

	<ul style="list-style-type: none"> Usually multi-lane Many but not all U.S. highways are in this class
Primary Highway	<ul style="list-style-type: none"> Move significant volumes of traffic at moderate speeds Most state roads fall into this class
Secondary Highway	<ul style="list-style-type: none"> These roads move moderate volumes of traffic over short to moderate distances Carry vehicles from local roads to higher class roads
Local	<ul style="list-style-type: none"> Function is to provide access to homes and properties
Ferries	<ul style="list-style-type: none"> Ferry routes (boarding/exit time not included)
Ramps	<ul style="list-style-type: none"> A connecting road leading on or off of a main road or highway
Sublocal	<ul style="list-style-type: none"> Accessible by vehicles but not suitable for through-routes and perform only a destination function. This class captures: Alleys, driveways, and parking lots
Pathway	<ul style="list-style-type: none"> Not accessible to vehicles; only accessible to pedestrians and bicycles. This class captures: Stairs, bikeways, trails, walkways, equestrian paths, and boardwalks

Road Speed Category by Jurisdiction (State/Country)

(An add-on license is necessary for regions other than North America.)
