

Hard Wiring Addendum to Manual for U.S. Hardwiring.

The power brick (supplied) should not be placed in a dead space such as a wall or ceiling.

To meet NEC code for these types of installations you will need to order a DC extension cable and place the power brick inside / on top of a Kitchen cabinet or anywhere you have accessibility. Each situation is unique. The extension needs to be minimum 18 Gauge to support 24v dc at 2.5amps. Search "B01GDR69WG" on amazon.com search bar for this 20' Extension that will work well with this speaker.

Don't hesitate to ask questions.

You can ask on amazon.com or call 612.644.9960
