What is MyAgData®?

MyAgData is a cloud-based application that automates the data collection and reporting process required by the USDA to satisfy obligations for both crop insurance and FSA program participation.

What is Prevent Plant?

Also known as prevented planting, it means a producer is unable to plant the intended crop acreage with proper equipment by the final planting date for the crop type because of a natural disaster.
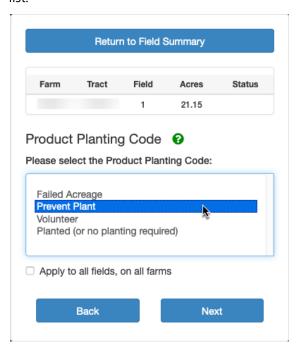

Apply Prevent Plant to a Field

1. Open your favorite browser (we recommend Chrome) and log on to MyAgData.
2. Locate the producer you're reporting on and click I**n Progress**.
3. Click **Field Details** at the top of the page and locate the appropriate field.
4. Select the field.

5. Click **Planting** in the details table at the bottom of the page.

Crop	Type	Int. Use	Planting	Irrigation
None	----	----	----	----

6. Select **Prevent Plant** from the Product Planting Code list.

7. Click **Next**.
8. Note that **PREVENT** now appears in the details table.

Share	Crop	Type	Int. Use	Planting	Irrigation
1.0000	None	----	----	PREVENT	----

9. Click **Return to Field Summary**.
