

Impero EdLink Guide 2018

Apple VPP configuration Guide.

EXTERNAL

Setting up Apple VPP application distribution.

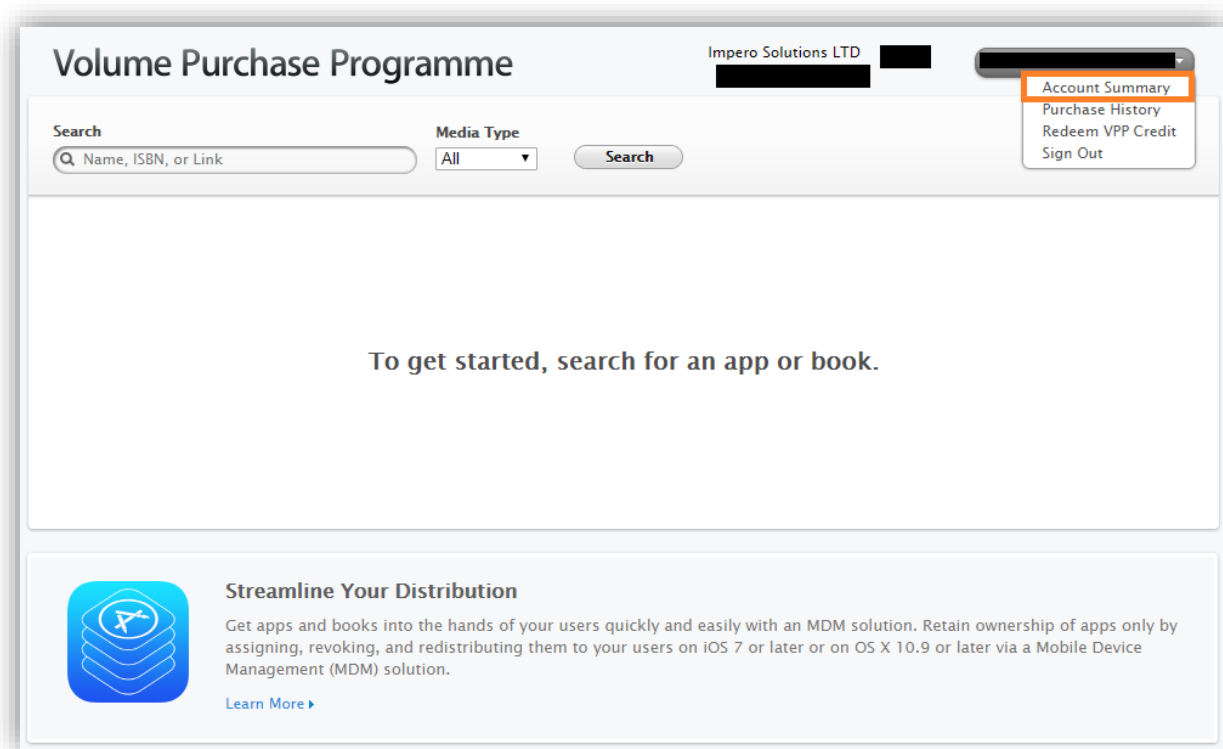

Set up Apple VPP application distribution and, using tags, specify if installation of applications will be to specific iOS devices or all iOS devices.

Step-by-step guide

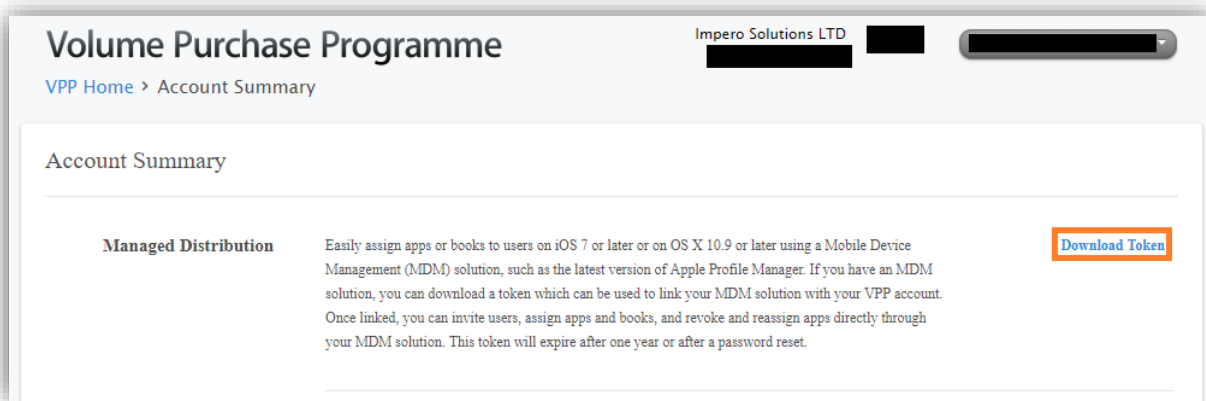

Open <https://vpp.itunes.apple.com> then click the **Education Volume Purchase Program** button.

Enter your Apple ID and Password then click **Sign In**.

On the Volume Purchase Program screen, click **Account Summary**.

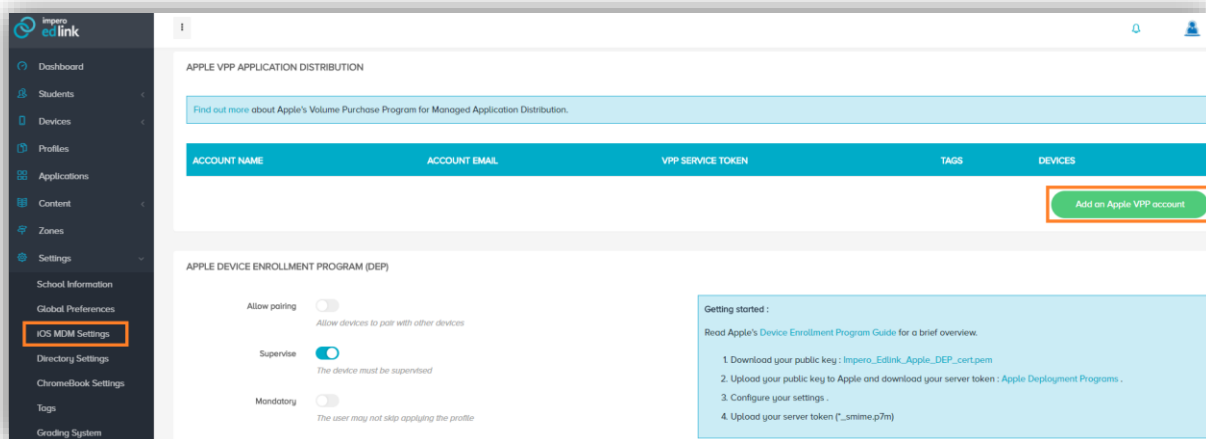

From the Managed Distribution section, click **Download Token** to save the text file (.txt) containing the VPP Token.

Sign in to Impero Edlink and navigate to *Settings > iOS MDM Settings*.

Click the **Add an Apple VPP account** button.

Enter the name you wish to give the account, enter the email address of the VPP account used and then click **Upload Token**.

Click **Browse...** to select the VPP Token .txt file downloaded in the previous steps.

Add new VPP account

Name

Impero VPP

Email

[Redacted]

Tags

Enter name of tag

Tags allow you to use this account for specific device pools only. Leave this blank to allow use on any device.

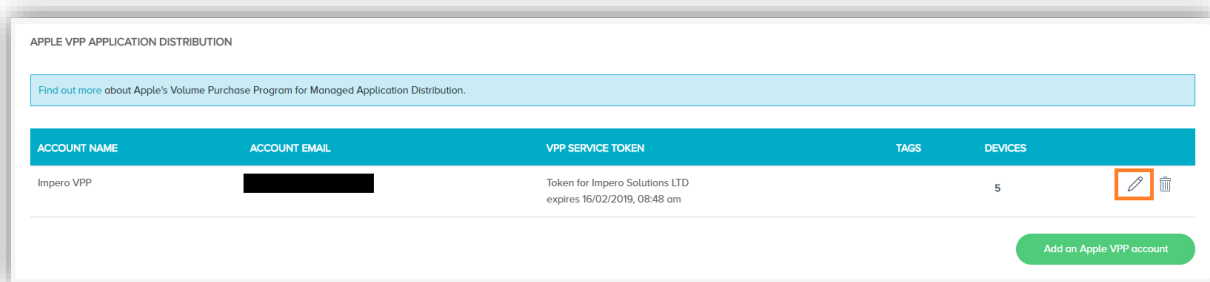

Upload Token Token for [Redacted] .vpptoken

Update Certificate

Then click **Update Certificate** to complete.

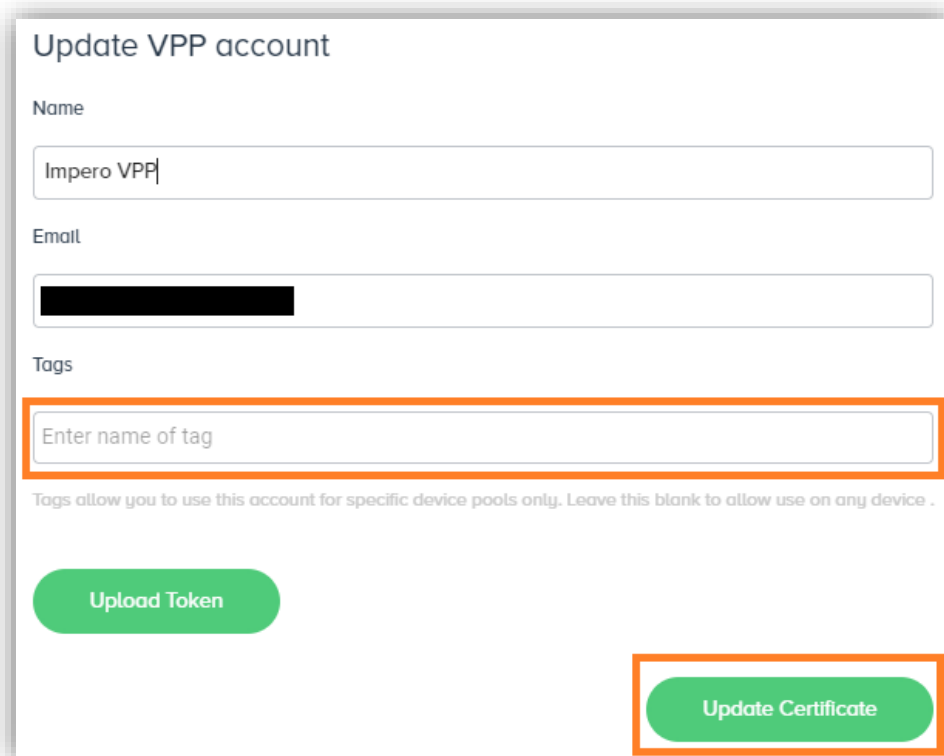

To add additional VPP accounts repeat the above process for each account.

To edit an account, click on the **Pencil** icon in the **Apple VPP Application Distribution** section.

Specifying a tag will limit VPP applications to specific devices, not specifying a tag will allow VPP applications to be installed to all iOS devices. To add an existing tag, type part of a tag name and then select a tag from the drop-down list of tags that match your search criteria. To add a new tag, enter a tag name and press **Enter**.

To save your changes, click on the **Update Certificate**.
