

## Pre-Teaching Vocabulary

### Quizlet

Quizlet is a website (<https://quizlet.com>) that allows you to create and work with digital flashcards, custom vocabulary games, and quizzes. There are also a number of pre-existing vocabulary sets that may be helpful. Quizlet enables students to interact with a vocabulary set in a range of different ways to help reinforce understanding.

### Moodle Glossary

The Moodle Glossary is much like a dictionary and allows students to find the meaning of words or phrases within their course. It offers an auto-linking feature that will highlight any word in the course which is located in the glossary. However, this feature only works on the Moodle page, so words within PDFs or external links will not be linkable with the glossary.
