1 FAMOC Interface Customization

FAMOC allows administrators to customize certain elements of the interface, such as footer links, company logo, colors of tabs and subtabs and icons.

1.1 Footer Customization

In order to customize footer of the FAMOC console, the admin needs to upload a properly prepared file to the following directory `/var/www/aplikacje/branded`.

```
[root@localhost ~]# cd /var/www/aplikacje/branded
[root@localhost branded]# ls
custom_footer.html.example  custom_title.html.example
[root@localhost branded]#
```

It is also possible to use an example file called `custom_footer.html.example`, which includes the original footer of the admin console. The file is located in the `branded` directory. To perform changes, edit the content of the file and remove `.example` from the file name.

NOTE: It is required that the file is named exactly "`custom_footer.html`".

1.2 Graphics Customization

All modifiable graphic files are available on the FAMOC server. To change an item, copy it from the `/var/www/aplikacje/img/darkblue_new` directory and, after modification, paste to a newly created directory: `/var/www/aplikacje/img/branded`.

The files located in `branded` directory have priority and are displayed automatically by the FAMOC console. If the graphics have no counterpart in the `branded` directory, FAMOC displays the files located in `/var/www/aplikacje/img/darkblue_new` directory.

NOTE: It is necessary that after modification, files pasted to the `branded` directory are given an identical name (lowercase / uppercase letters), size (height / width) and format as the original files from the `/var/www/aplikacje/img/darkblue_new` directory.

1.2.1 Left Logo Customization

- File that needs to be edited: `logo_left.png`
- Required file format: PNG
- Required file size: "X" x 25 pixels (where "X" means the custom width of the file)

1.2.2 Right Logo Customization

- File that needs to be edited: `logo_right.png`
- Required file format: PNG
- Required file size: "X" x 25 pixels (where "X" means the custom width of the file)

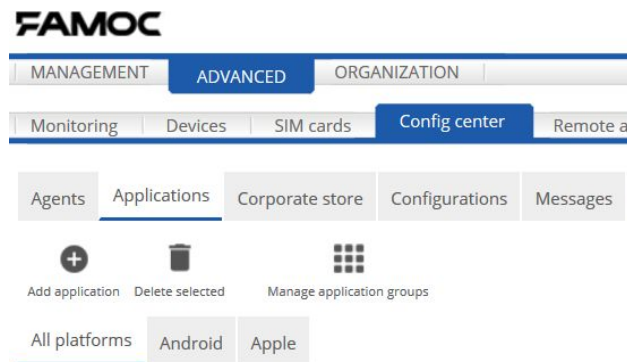

1.2.3 Tabs Color Customization

- Files that require to be edited:
 - C_close_tab.png
 - C_close_tab2.png
 - C_open_tab.png
 - C_open_tab2.png
 - L_L_close_tab.png
 - L_L_close_tab2.png
 - L_L_open_tab.png”
 - L_L_open_tab2.png
 - L_open_tab.png
 - L_open_tab2.png
 - L_R_close_tab2.png
 - R_open_tab.png
 - R_open_tab2.png
 - R_R_close_tab.png
- Required file format: PNG

1.2.4 Changing style

File - /var/www/apps/css/style.css

Dark blue FAMOC colour is #1e5aaa, which can be replaced according to your own needs. Providing software producer with colour code is required.

1.2.5 Favicon Customization

- File that needs to be edited: favicon.ico
- Required file format: ICO
- Required file size: 16 x 16 pixels

- File that needs to be edited: favicon.png
- Required file format: PNG
- Required file size: 196 x 196 pixels

1.3 Page Title Customization

In order to customize page title of the FAMOC console, the admin needs to upload a properly prepared file to the following directory `/var/www/aplikacje/branded`.

It is also possible to use an example file called `custom_title.html.example`, which includes the original title of the admin console. The file is located in *the branded directory*. To perform changes, edit the content of the file and remove `.example` from the file name.

The content of the file should contain "`<title></title>`" tag with custom title inside.

NOTE: It is required that the file is named exactly "`custom_title.html`".

1.4 Removing of the Copyright

In order to remove copyright sign from FAMOC console footer, the admin needs to upload an empty file "`_NO_COPY.txt`" into the `/var/www/aplikacje/branded` directory.

NOTE: It is required that the file is named exactly "`_NO_COPY.txt`".

1.5 FAMOC String Customization

In order to customize 'FAMOC' or 'FancyFon Mobility Center' strings in the console, the admin needs to upload a properly prepared file named "`system_display_name`" to the `/var/www/aplikacje/branded` directory.

File should contain string that will replace both words in the console.

NOTE: It is required that the file name is named exactly "`system_display_name`".

2 New FAMOC GUI Customization

In order to edit new FAMOC GUI elements, it is necessary to create and edit the content of the file `application.conf.brand`, which is located in the `/var/www/famocx/protected/configuration` directory. The variable needs to be changed as shown below.

```
[system]
CUSTOM_THEME=1
CUSTOM_THEME_NAME=blue-famoc
```

It is possible to choose color from a list of predefined colors.

black-orange.csse - #f37321

black-purple.css - #642E86

black-red.css - #ff0000

black-white.css - #000000

blue-famoc.css - #00b4ff

green-atlantis.css - #66cc33
green-goblin.css - #3d8840
green-lima.css - #68af22
lady-in-grey.css - #E20074
lmt-orange.css - #FF6A13
pink-lady.css - #E20074
purple-eminence.css - #642e86
red-crimson.css - #e0201b
red-e21838.css - #e21838
red-ribbon.css - #e20031
red-solid.css - #ff0000

2.1 Footer Customization

In order to customize the footer of the FAMOC console, the admin needs to upload a properly prepared file to the following directory `/var/www/famocx/themes/custom/html`.

```
[root@localhost html]# pwd
/var/www/famocx/themes/custom/html
[root@localhost html]# ls
footer.html footer.html.example title.html title.html.example
[root@localhost html]#
```

It is also possible to use an example file called `footer.html.example`, which includes the original footer of the admin console. The file is located in the `html` directory. To perform changes, edit the content of the file and remove `.example` from the file name.

NOTE: It is required that the file is named exactly `"footer.html"`.

2.2 Graphics Customization

All modifiable graphic files are available on the FAMOC server in the directory: `/var/www/famocx/themes/custom/images`.

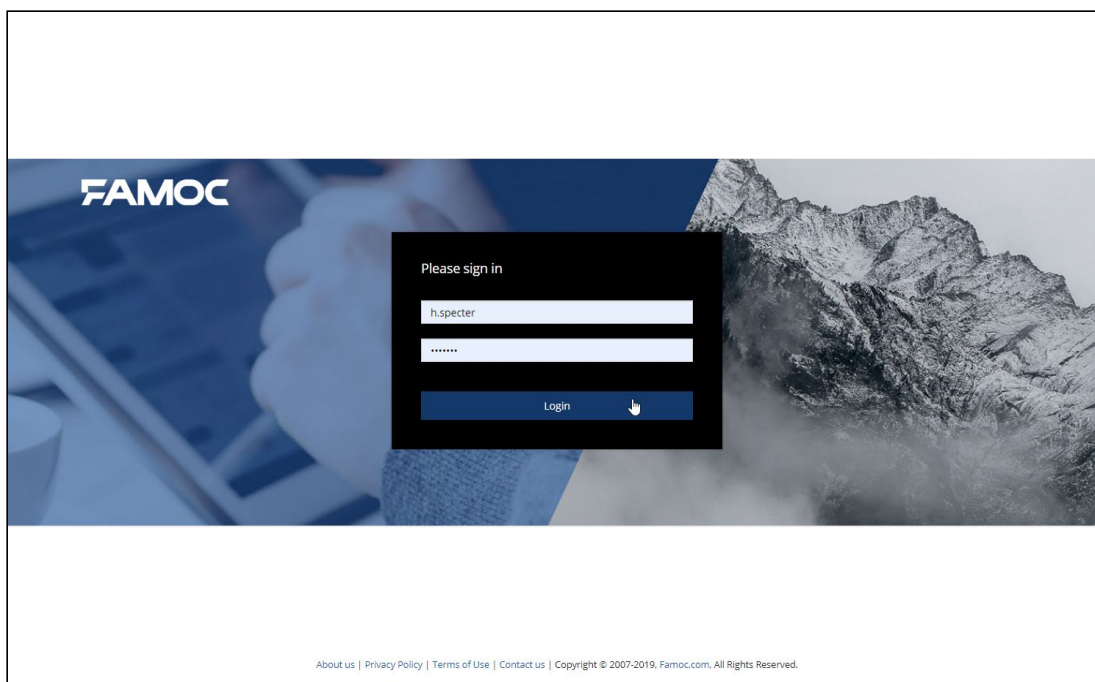

2.2.1 FAMOC Logging Page Logo Customization

- File that needs to be edited: `system_logo_login.png`
- Required file format: PNG
- Required file size: 200 x 150 pixels

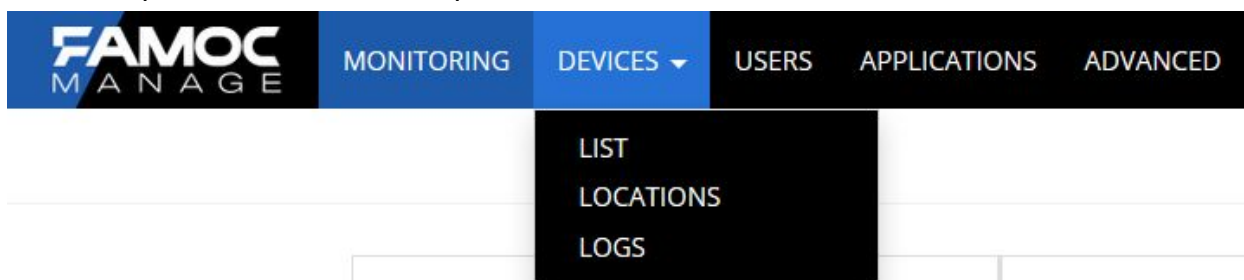

2.2.2 Custom background on login page

- File that needs to be edited: system_background_login.png
- Required file format: PNG
- Required file size: 1920 x 500 pixels

2.2.3 Monitoring page Logo Customization

- File that needs to be edited: system_logo.png
- Required file format: PNG
- Required file size: 230 x 62 pixels

2.2.4 Favicon Customization

- File that needs to be edited or created: favicon.ico
- Required file format: .ico
- Required file size: 32 x 32 pixels

- File that needs to be edited or created: favicon.png
- Required file format: .png
- Required file size: 196 x 196 pixels

2.3 Page Title Customization

In order to customize the title of the FAMOC console, the admin needs to upload a properly prepared file to the following directory `/var/www/famocx/themes/custom/html`.

```
[root@localhost html]# pwd
/var/www/famocx/themes/custom/html
[root@localhost html]# ls
footer.html footer.html.example title.html title.html.example
[root@localhost html]#
```

It is also possible to use an example file called `title.html.example`, which includes the original title of the admin console. The file is also located in the `html` directory. To perform changes, edit the content of the file and remove `.example` from the file name.

The content of the file should contain "`<title></title>`" tag with custom title inside it.

NOTE: It is required that the file name is exactly "`title.html`" and "`footer.html`".

2.4 Replacing phrase 'FAMOC' in new interface

In order to replace the phrase 'FAMOC' with custom name, after loading the translation file, place the properly prepared `system_display_name` file in the `/var/www/famocx/themes/custom` directory. This file should contain content that will replace the words.

NOTE: It is important that the file name is `system_display_name`.

3 MyDevice Portal Customization

3.1 Graphics customization

All modifiable graphic files are available on the FAMOC server in the directory: `/var/www/myDevice/self/images`.

3.1.1 MyDevice Logo Customization

- File that needs to be edited: `famoc-logo.png`
- Required file format: PNG
- Required file size: 200 x 77 pixels

3.1.2 Color Customization

In order to set a different color in myDevice portal, it is necessary to edit the content of the file *famoc.css*, which is located in the `/var/www/myDevice/self/css` directory.

- File that needs to be edited: *famoc.css*
- Required file format: CSS

Inside the content of this file search for RGB color that was used in original branding which is "#00a1e4". In order to change the color it is necessary to replace each #00a1e4 to the desired branded color (example red is #FF0000).

3.2 Page Title Customization

In order to customize the title of the FAMOC console, the admin needs to change content of two files located in the following directory `/var/www/myDevice/self/`

- File that needs to be edited: *index.php*
- Required file format: PHP
- Required changes: each `<title>FAMOC</title>` within the file changed to custom title.
- File that requires to be edited: *oldbrowser.html*
- Required file format: HTML
- Required changes: each `<title>FAMOC</title>` within the file changed to custom title.
