

FULVIC ZEOLITE

1fl oz

Certified Organic
Non-GMO Verified
Vegan
Soy-Free

Zeolite, one of the few negatively charged minerals, is formed naturally when volcanic lava reacts with cooling waters. Our zeolite has been synergistically combined with fulvic acid to create Fulvic Zeolite, which acts like a magnet, drawing positively charged toxins and heavy metals out of the body. We recommend combining it with any of our green foods for added assimilation.

- An effective part of any cleansing program
- Contains no synthetic chemicals
- Helps balance pH levels and restore electrical conductivity in the body

HEAVY METAL CLEANSER

Pure Planet's Fulvic Zeolite is a blend of zeolite and fulvic acid. Our proprietary combination activates and mobilizes zeolite through the activity of fulvic acid.

WHY WE OFFER FULVIC ZEOLITE

Zeolites are a group of micro-porous crystals and minerals with negatively-charged honeycomb structures. Negatively charged zeolites act as a magnet, by drawing positively charged toxins into their matrix and preventing them from entering our bodies. Pure Planet uses a proprietary combination of fulvic acid and zeolite to support a gentle and easy cleansing. This method is one of the least invasive on the market and creates naturally effective zeolite.

INTERESTING FACTS

Zeolite structures are created when superheated molten lava flows toward the ocean. Upon entering the cold ocean water, the instantaneous chemical reactions caused by the superheated and liquefied minerals cause them to form into what is perhaps one of nature's most uniquely shaped and charged elements. Zeolite low molecular weight yet highly toxic substances from the body. It also has the unique ability to capture molecules between 2 and 10 angstroms and trap them so they cannot leave its honeycomb structure.

HISTORY

Historically, Zeolite has been used for odor elimination (for farm animals), water purification, air purification, and soil decontamination. Zeolites have been used in agriculture as both a vital mineral source and for their ability to slowly release water to plants upon demand. They prevent root rot and help trees survive in droughts. When given to animals, zeolite reduces the airborne ammonia from feces by 80% and acts as a micro-toxin binder. It is also used to help improve the bone density of animals.

POTENTIAL BENEFITS

Zeolite increases the viability of cells and organs that have been inhibited by toxins and heavy metals. It can help alkalize and detoxify the body effectively.

HOW IT IS MADE

Zeolite forms naturally when volcanic lava reacts with salt water. For Pure Planet's Fulvic Zeolite, the clinoptilolite zeolite ore is pulverized and micronized into powder. This powder is blended with 3% fulvic acid in a 100 gallon stainless steel container. It

is then agitated, blended and ultrasound is applied while the mixture is blending to clean zeolite cages for 60 minutes. The solution is then run through a nano-filtration mesh screen into a 100 gallon stainless steel tank. Quality Control (QC) samples are taken for bacteria and periodic heavy metals testing. The solution is then quarantined for 7 days. Finally, QC samples are taken again before being bottled for use.

Supplement Facts

Approx 145 servings per container

Serving size **3drops**

Amt per serv. **% DV***

Fulvic acid	†
Zeolite (Clinoptilolite)	11mcg †

* The % Daily Value (DV) tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calories a day is used for general nutrition advice.

† Daily value not established

SUGGESTED USE:

Adults - Hold 3 drops under tongue for 10 seconds then swallow or mix with any juice or water 3 times a day. Start with 1 drop, 3 times a day and slowly increase to 3 drops, 3 times a day over a period of 2 weeks. Best results when mixed with a green drink. Children - take one drop a day mixed with juice or water.

INGREDIENTS: Supercharged activated fulvic acid, zeolite.
