

7

Use the wiggly eyes or the sunglasses

8

Add the pom pom tail with glue dots

**PRO-TIP**

If you want to add more glitter after you have folded your llama, make sure the glue dries while it is laying down or it will drip off of the surface.

9

For added stability, add clear stickers to the front and back of the neck piece to secure it to the body.

front

10

Plug in and light up!

1

Decorate your lamp before constructing it with epoxy and glow in the dark stickers

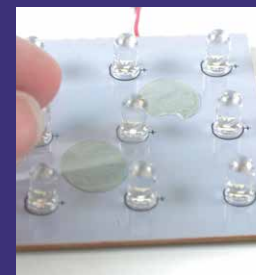

2

Add glitter detail while your llama is flat. Allow to dry.

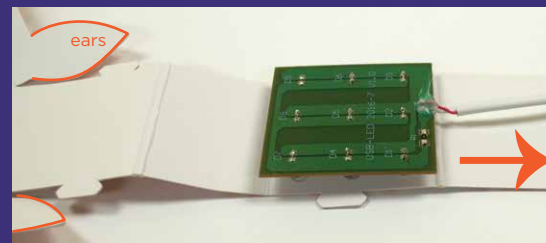

3

Apply glue dots to top of light board between lights

4

Line up lights with holes on llama, with cord going in opposite direction of ears

5

Push lights through holes to stick light board to llama board

Safety First! As with any electrical appliance, please seek adult permission and assistance before operating the light. You will need to insert your USB into a USB port or a plug (not included).

Handle with care and save any materials for touch up and repairs.
