© Faber-Castell USA, Inc. • Cleveland, Ohio 44125 • www.fabercastell.com
Designed in USA • Conforms to ASTM D-4236 • Non-toxic Safe for Children

Ages
7 to 97

Light-up Heart MARQUEE

Before You Begin

Glitter glue and markers may rub off on skin, clothing and other surfaces. Wear old clothes and cover your work area.

Color

- Color in your heart design using the markers included in your set. Color in a little, or color a lot, it's all up to you. Remember to keep your markers tightly capped when not in use.
- Prefer to personalize? Just flip the heart over and create your own heart-art.
- Color in the side pieces as desired. Like the heart, you can decide how much to color.

Rhinestones and Sparkle

- Accent your design with the self-adhesive rhinestones
- Squeeze on the glitter gel to accent your heart. As the gel dries it will enhance the colors and make them sparkle wherever it is applied.

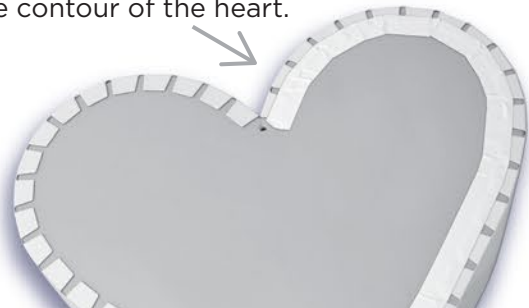

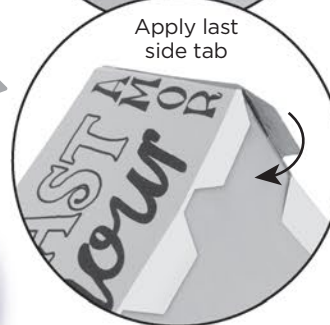

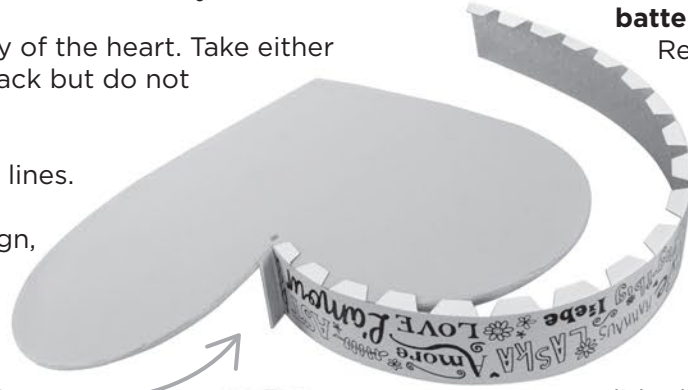

The glitter gel must be completely dry before moving on to the next step.

Adding the Foil Frame

If you need help with this step, ask an adult to assist you.

- Your starting point will be the valley of the heart. Take either frame piece and fold the end tab back but do not peel the release paper until later.
- Fold the side tabs along the crease lines.
- With the foil facing your heart design, remove the release paper from the side tabs a small section at a time. Apply them around the back edge of the heart as shown. Press firmly. **NOTE: Leave the release paper on the last side tab.**
- Take the second frame piece and fold the side tabs as you did the first piece.
- Now remove the release paper from the end tab of the first piece and begin to apply the other frame side as shown.
- When you reach the bottom point of the heart, remove the release paper from the end tab. Tuck it under the first frame piece and seal pressing firmly.
- Remove the release paper from the last side tab and fold it over pressing firmly.
- Use the white finishing tape to secure the tabs on the back of the frame. Overlap half of each tab following the contour of the heart.

Assembling the Light

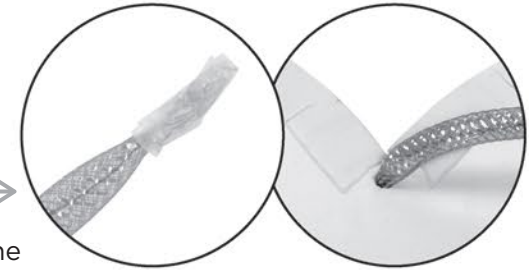

The LED lights require two AA batteries - not included. **Insert your batteries following the + and - icons inside the battery pack.** Refer to the Battery Warnings at the end of the instructions.

- Fold the end of the wire over forming a loop as shown.

- Insert the led lights into the pink mesh tube as shown. The looped end will help keep the wire from poking out as you slide it through the entire mesh tube.

- Slide the end of the light/mesh through the hole in the heart base from back to front. If the end of the light/mesh is frayed, wrap it with a piece of tape.

- Turn on the lights. Arrange the light cord around the inside edge of the frame. Use the sticky dots to hold it in place. Then secure the mesh tube with craft glue.

- Push the light/mesh back through the hole when you reach the end. Use a pencil or pen to push it through the hole as needed.

Display your Heart

With the on/off switch facing out, attach your battery pack to the back of the heart using the adhesive backed Hook & Loop squares. Place the battery pack so the heart can be displayed as desired. Centering it is best for hanging.

Use the clear tape to secure the loose mesh/light.

If hanging, add the hang tab to the battery pack. Peel and press it into place. ***Ask for adult assistance before hanging your heart.**
