**Creativity for Kids**  
 FABER-CASTELL

We all know that temporary tattoos are fun and cool to wear. With this kit you can design and color in your own. Use the tattoo outlines in this kit and color them in using skin friendly tattoo markers. You can also be extra creative and design your own tattoos by using the tattoo markers to draw directly on you or your friend's skin.

## Information About the Tattoos and Markers

The tattoo transfers and the tattoo markers are specially formulated from water-based, non-toxic, skin friendly inks. Tattoos will wear off in 1-3 days. They can be removed by applying adhesive tape and peeling it off or by applying rubbing alcohol on a cotton ball and dabbing them off. They can also be removed using plain old soap and water and a little scrubbing.

**Sensitive skin warning- if you experience any redness or skin irritation when using the tattoos, discontinue use and remove the tattoo immediately. *Applying tattoos to your face is not recommended.***

## Tattooing

- The first step is choosing the design you want.
- Use scissors to cut out a design along the dotted line.
- Remove the protective cover and apply to skin. The side with the black ink should be against your skin; the side with the gray printing should be facing up.
- Place the wet sponge over the tattoo, apply pressure and hold in place for about 30 seconds.
- Slowly peel off the paper and the tattoo is transferred to your skin!
- Once your skin is dry, it's time to color in your tattoo.
