PowerBuilder 2017 Datasheet

Build Faster, Better, Business Apps

Compliance

Remain eligible to receive tech support, keep your production apps running smoothly, and comply with corporate policies.

Windows 10 & Updated DB Drivers

Take advantage of these new OS and database versions without risk or headaches.

New Desktop Features

Enhance your existing apps with native PDF, dockable windows, OData, and 64-bit executables.

New Mobile Apps

Leverage existing skills and code assets to rapidly develop cross-OS mobile apps with native mobile functionality powered by Apache Cordova.

INNOVATIVE FEATURES

The new PowerBuilder roadmap keeps what you love and adds proven technology standards. Your projects will benefit from core desktop enhancements, improved productivity, n-tier app architecture, and .NET interop.

DELIVERED YEARLY

The new innovative features of PowerBuilder are delivered to you in agile yearly cycles, which will allow you to keep your apps up-to-date. But upgrades are never forced onto you.

AT A NEW LOW PRICE

PowerBuilder 2017 licenses are sold on a subscription basis. This eliminates the purchase of an expensive perpetual license, ensures you are never denied an upgrade, and allows you to flexibly adjust your team size.

Legacy PowerBuilder Users

This new major release of PowerBuilder was designed with ease of upgradeability in mind for existing SAP customers. It is the first new installment of PowerBuilder by Appeon since it entered into agreement with SAP in July 2016 to move your apps forward into the future.

The traditional desktop app was intentionally enhanced only with absolutely critical new features to ensure that you can quickly and reliably switch off Power-Builder 12.x before that version is discontinued.

Pricing

PowerBuilder 2017 is sold as a subscription, which includes a non-perpetual license for the software, access to upgrades, and standard technical support. Regardless you have an active support plan with SAP or are still using a very old version of PowerBuilder, you may upgrade by simply purchasing a subscription of PowerBuilder 2017.

STANDARD

$695

developer / year

This is virtually similar to the previous Enterprise Edition, with the exception of .NET Web Services and Assemblies. Great for developing traditional desktop apps.

CLOUD

$995

developer / year

Ideal for customers that want to take advantage of Web APIs, share business logic among apps, and simplify deployment to the desktop with an n-tier Internet architecture.

UNIVERSAL

$1595

developer / year

Ideal for customers that want their business apps and data to be accessible on practically any device and OS, and powered by an n-tier Internet architecture.

System Requirements

Desktop. Windows 7-10 and Windows Server 2008-2016 (32-bit or 64-bit).

Mobile. iOS 9.x or 10.x and Android 5.x or 6.x. Please refer to product manuals for certified devices.

Server. Microsoft IIS 7-10 on Windows Server 2008-2016 with .NET 4.x framework (32-bit or 64-bit).

Database. ADO.NET, Native, and ODBC interfaces for accessing most leading databases and versions. Please refer to product manuals for details.
