

FLEET FREEDOM®

Fleet Freedom® is fully integrated with Google Maps for Business and Street View by Google. Using these services, users will see an interactive image of the area when viewing a location in the portal.

Fleet Freedom® provides a built-in dispatch tool to assign tasks to field employees, receive turn-by-turn routing to destinations and send task completion notifications back to head office. Use the portal to see which employees are on shift and working, what vehicles or equipment they're driving and which tasks they've completed throughout the day.

Our reports are fully customizable. Build your reports to track utilization and maintenance data for vehicles and assets, or review employee productivity data and driver behaviour reports, all in the comfort of the Fleet Freedom® portal.

Fleet Freedom® Mobile

This valuable service can be used as a stand-alone service and is completely integrated into our Fleet Management service. This tool was designed with two goals. The first, to equip employees with the necessary tools to perform their job functions consistently and reliably. The second, to provide Dispatchers and Fleet Managers the ability to see current employee location, communicate, automate dispatch, review or re-assign tasks and provide pain free ad-hoc dispatch.

Employees can use our mobile application to help manage their daily tasks.

- Virtual Punch Clock & HOS** ▶ View assigned tasks in real time, based on who's on shift
- Location Updates** ▶ Great for efficiency tracking, billing and payroll
- Driver ID** ▶ Get first dibs on which vehicle or equipment you are driving
- Dispatch Tasks** ▶ Receive all your tasks for the day and send confirmation upon completion
- Custom POI List** ▶ Instantly route yourself to any frequently visited locations

Asset Location Services

Fleet Freedom® employs a variety of flexible asset tracking devices and technologies to meet and exceed our client's asset location needs. We provide many flexible and cost effective options to help you manage your business. Clients can administer theft prevention, theft recovery, inventory management and productivity in a single service.
