

VEHICLE MANAGEMENT

Wherever your business goes Fleet Freedom® can help you find it!

Fleet Freedom is a web-base location and fleet management application. Our clients use this service to see real-time location of assets and run historical summary reports on behaviours, actions and exceptions. Clients receive email or SMS notifications for speeding and geo-zone based events.

Tracking your Fleet of Vehicles is a Breeze with the Fleet Freedom® Application

- **Compatibility:** Fleet Freedom is compatible with many of the industry's most popular GPS modems.
- **Knowledge:** Vehicle tracking gives you access to see your vehicle's current speed, engine idle state, location, address, heading, GPS odometer and geo-zone status.
- **Policies:** Fleet Freedom can assist your company in enforcing your policies by quickly identifying vehicle exceptions like excessive speeding, idling, or geo-zone lingering
- **Flexible on demand or automated reports:** An industry best, Fleet freedom reports are there to provide you with accurate and relevant data to help you manage your business. Run reports on demand or set up an automated schedule for your entire company, selection of fleets, or for a selection of vehicles. The reporting section can quickly identify vehicle exceptions like excessive speeding, idling, or geo-zone lingering. Run a Zone report to see how long your vehicles spend on job sites and receive email notifications when vehicles stay too long in a zone, speed or idle excessively. Reports can be downloaded, printed and saved right from the application.

Vehicle Advantages & Benefits:

- Reduce fuel and maintenance costs
- Increase employee efficiency
- Increase employee safety
- Effective dispatching and scheduling
- Increase billing accuracy
- Improve communication and customer satisfaction
