Smart Assessor is an electronic collection of a learner's skills and knowledge, which is assessed by their tutor against a training standard or qualification and replaces paper portfolios.

Perfect for apprentices, work based learners, classroom students and anyone undertaking training, as you can replace paper evidence with videos, photos and voice recordings as evidence of competence and the portfolio is always available, both offline and securely on the web.

Assessors and tutors can track learner progress dynamically to achieve timely completions.

2. From the Homepage, select the course and assessor to which the email is to be sent to.
