HP used 3D Printing Powder and used 3D printed Products Partners European Waste catalogue (EWC) Classification

TO WHOM IT MAY CONCERN

Sustainability &
Compliance Center:
sustainability@hp.com

While it is the producer's/holder's obligation to classify waste, HP's analysis for the purposes of our Planet Partners Program for take-back and recycling of used 3D printing powder and used 3D printed products, is that used 3D printing powder and used 3D printed products can be classified under EWC code 12 01 05.

The relevant law setting out the EWC codes is Commission Decision 2000/532/EC replacing Decision 94/3/EC, amended by Commission Decision 2014/955/EC, establishing a list of wastes pursuant to Article 7 of Council Directive 2008/98/EU on waste.
