HIK CONNECT APP

Sharing With Other Devices

Quick Guide

Hik-Connect

Hik Connect CCTV App - Sharing with other devices

This guide will show you how to share the App with other devices.

You must already have the App setup on a mobile or tablet as explained in the previous how to guide 'Hik Connect Setup App' For the purposes of this guide we will call this the **'Main Device'**

The devices you want to share the App with must also download Hik Connect and register as a different user. For the purposes of this guide we will call this the **'Secondary Device'**

On the Main Device home screen in the bottom right hand corner there is a button labelled **'More'**

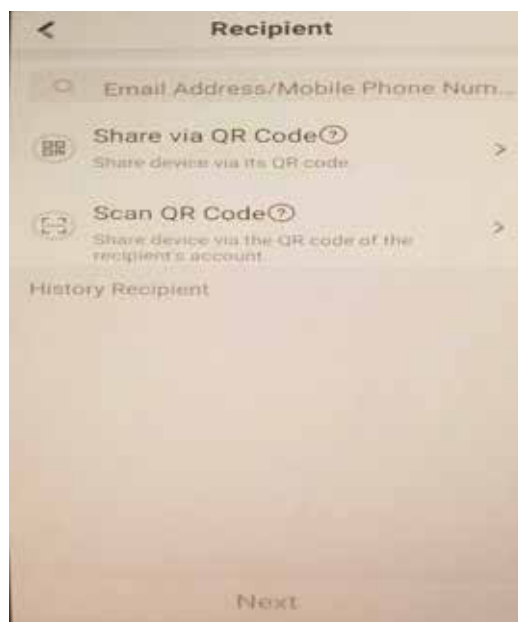

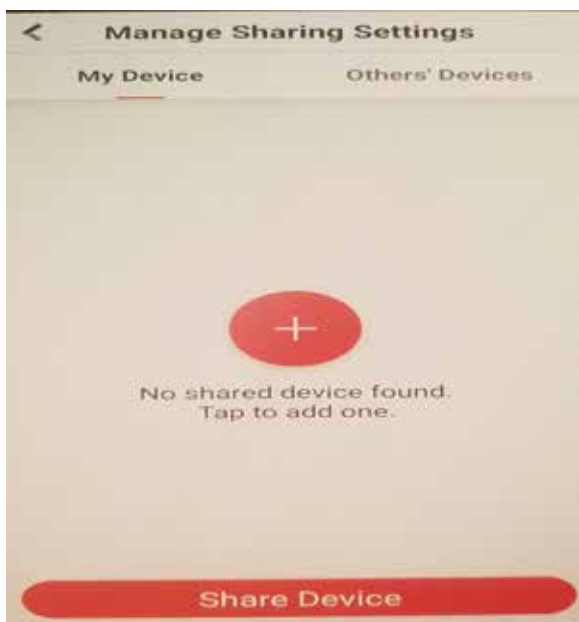

If you press this it will take you to the following screen where you need to choose the **Manage Sharing Settings**.

Hik Connect CCTV App - Sharing with other devices

If you press **Share Device** at the bottom of the screen, then choose the **Share via QR Code** option.

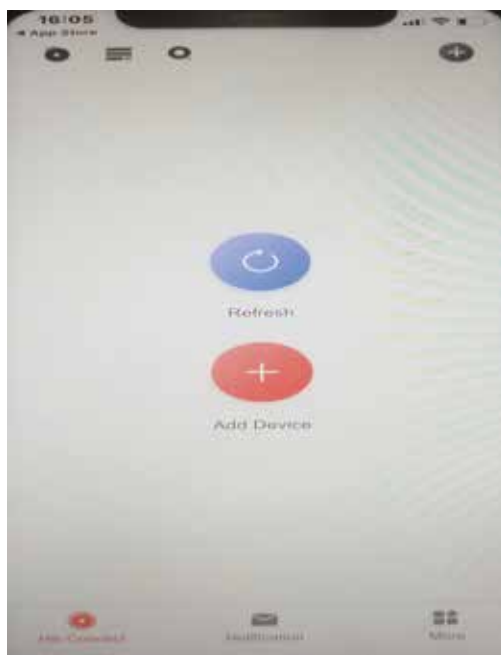

On this screen you choose what NVR's you want to share with the other devices. On our example we only have 1 NVR which is called Home, if you have multiple NVR's in the App then you will see them listed here and you choose which ones you want to share.

If you **Press the Home Icon** you will see the tick appear next to it **Press Next** at the bottom of the screen. You will then have a **QR Code** appear on the screen. The **QR Code** is what you will use to scan onto the **Secondary Device**.

Hik Connect CCTV App - Sharing with other devices

We now need to get the **Secondary Device** which needs to have the **Hik Connect App Installed** and the user to have a registered account. You will then see this screen, where you need to **Add Device**.

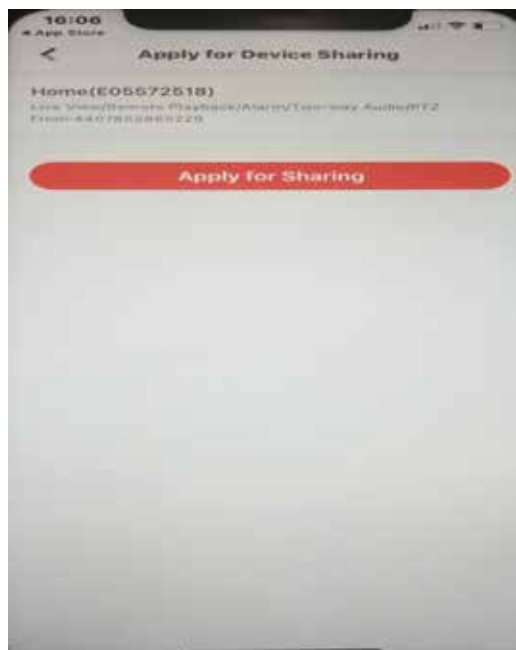

This will then take you to a **QR Code Scanner**, you will use this to scan the **QR Code** from the **Main Device**.

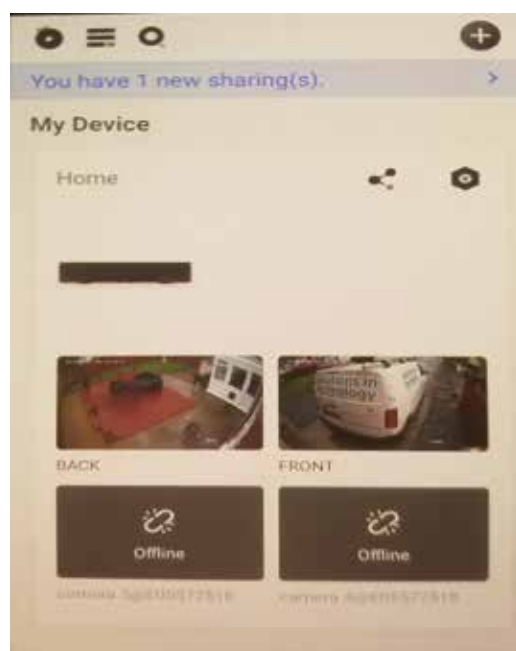

Hik Connect CCTV App - Sharing with other devices

When you have scanned the **QR Code** it will take you to the following screen on the **Secondary Device**. From here you need to **Press the Apply for Sharing** button.

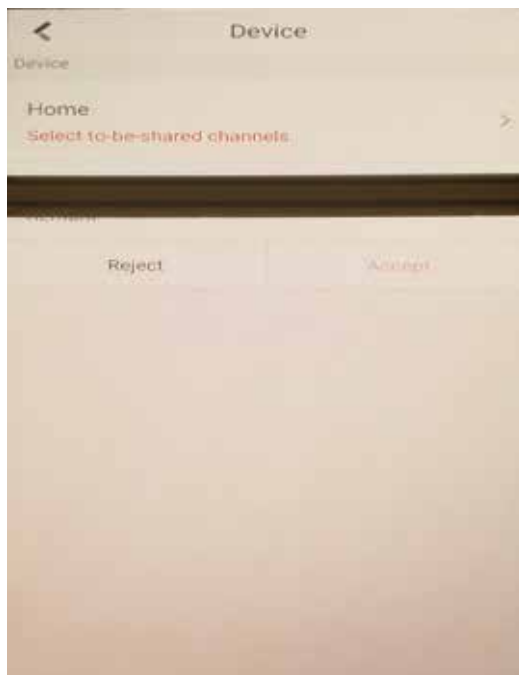

If you now go back to the **Main Device** and go to the **Home Screen** of the **Hik Connect App**, you will see a **Notification** saying **You have 1 new sharing**. Press on this notification.

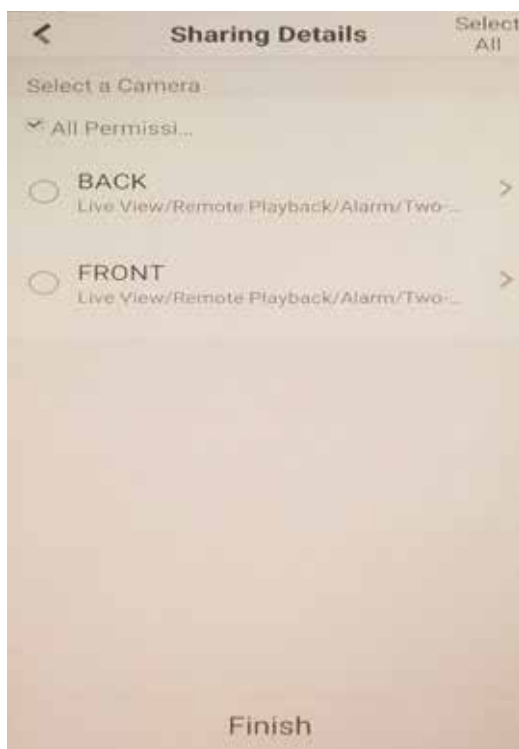

Hik Connect CCTV App - Sharing with other devices

It will then take you to the following screen. Here you will see the email address or mobile number of the **Secondary Device** (blanked out on below illustration) **Press the Home** option.

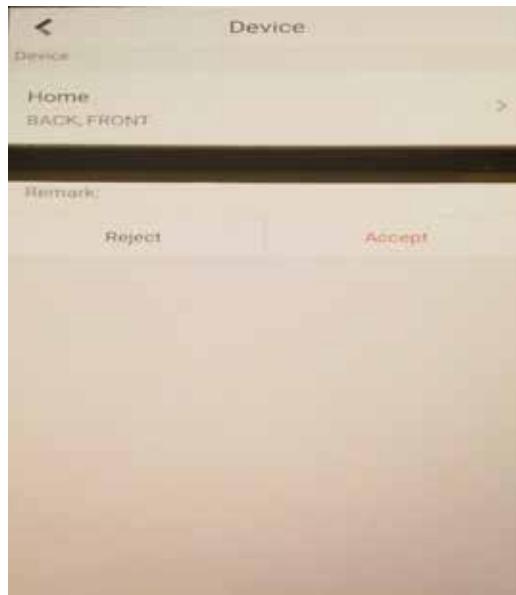

You can now choose which cameras you want to share with the **Secondary Device**. If you want to share them all **Press Select All** in the top right hand corner of the screen. Or you can choose individual cameras by **Pressing and Highlighting** those displayed. When you have selected your options **Press Finish** at the bottom of the screen.

Hik Connect CCTV App - Sharing with other devices

On the next screen you will see the options you choose to share and you need to **Accept** them.

When you have accepted this on the **Main Device** you should then see the cameras appearing on the **Secondary Device** as shown below.

Hik Connect CCTV App - Sharing with other devices

Finally if you **Press** the boxes where the camera names are displayed you will see **Live View** of those cameras.

You can share the app with as many users as you want, but all must be shared from the **Main Device**.

If you have any issues setting up, please call the SIT Helpdesk on : **0333 200 4330**
