FilleZilla-Connect to Client SFTP

Once FileZilla is successfully installed, Open FileZilla.
Click the File option in the top-left corner and select Site Manager…

1. Click the New Site button (Optional: Click Rename button and rename)
2. Host: ftp.repspark.net
3. Select Encryption: SFTP (secure)
4. Select LogonType: Normal
5. User: **username**
6. Password: **password**
7. Click OK to save the newly added site.

FileZilla-Connect to SFTP

    a. Click the file option in the upper left-hand corner and select Site Manager.

    b. Select the site you just created.

    c. Click the Connect button.

Once you have successfully connected, you will see the screen split into two sides. The left-side is your local computer directory while the right-side is the SFTP directory.

Local site:	C:\Users\RSKAdmin\Pictures\Demo_Images\Backpack\		Local Computer

Filename	Filesize	Filetype	Last modified

Remote site:	/ProductImages/Insignia		FTP Server

d. On the left (local computer) side, navigate to the directory where your images live. In the bottom panel on the left-side, highlight all files you want to copy to the SFTP. (Windows: CTRL + A to select all. Mac: Command + A to select all).

e. Once all files are selected, drag the files from the bottom-left panel to the bottom-right panel.
