

Have limited time? Use these simple **daily**, **weekly**, and **monthly** steps, and you'll find that engaging your community is easier than you thought!

Daily

Review what's new.

- Log in to your site manager panel and review any new or pending content.

Check out the view!

- Explore the volunteer side of your site to ensure that it's up to date and engaging. Old or stale information can be confusing and may cause visitors to lose interest.

Weekly

Feature an agency or opportunity on social media.

- Share frequently to promote awareness and draw more visitors (and volunteers!) to your site.

Keep up with new agencies.

- Offer a hand to agencies who started a profile but didn't finish. This is a great chance to start a new relationship.

Monthly

Plan what you'll highlight this month.

- Use spotlights and image rotator to get visitors excited about a current agency, seasonal needs, upcoming events, and more.

Check your Agency Activity Report

- Identify which agency managers need assistance, guidance, or training ... and ask how you can help!
