

How to access Job and Task tracker using Browser

You can access all of these details on your local browser.

Open up your browser and type the following:

A: NameNode status: <http://ec2-54-245-194-125.us-west-2.compute.amazonaws.com:50070/dfshealth.jsp>

B: JobTracker status: <http://ec2-54-245-194-125.us-west-2.compute.amazonaws.com:50030/jobtracker.jsp>

C: TaskTracker status: <http://ec2-54-245-194-125.us-west-2.compute.amazonaws.com:50060/tasktracker.jsp>

D: DataBlock Scanner Report: <http://ec2-54-245-194-125.us-west-2.compute.amazonaws.com:50075/blockScannerReport>

You may face some problem accessing the file system. It will change your link to localhost.

You can overcome it by replacing the **localhost** to ec2-54-245-194-125.us-west-2.compute.amazonaws.com
