

Tip 1

The first thing to do is go to the Settings > Locations tab and enter the external IP address of where your DNS requests will be coming from.

Tip 2

Go to the Policy > Categories tab then block the categories you do not want people to access.

Most Popular Blocked categories:

- Criminal Skills/Hacking
- Gambling
- Hate Speech
- Illegal Drugs
- Phishing/Fraud
- Pornography/Sex
- Spyware and Malicious Sites
- Translator
- Weapons

Tip 3

WebTitan Cloud simplifies WiFi security management. It takes care of all the complexities of content filtering and security while presenting a logical interface that requires no training. It requires NO software installation and NO need for technical expertise to set up or manage customer accounts – it's that simple.

Tip 4

If you have domains that you want to whitelist for everyone or Block for everyone then go to the Settings > White/Black lists and add these here.

Tip 5

There is a blue "?" on each tab this will give you more information on every setting of the tab you are looking at. Created per location preventing users from accessing unwanted content and blocking malicious websites. The

This is the basic setup, now once you point your DNS to send to your WebTitan Cloud Server all requests from that IP will be associated with this Policy.
