

# SURFSIGHT DASHCAM(L) SPECIFICATIONS

SurfSight Dashcam Cloud Service is a plug-and-play, mobile video monitoring solution; streaming live-video from vehicles to the cloud over the mobile network.

### View Live Video Instantly

View front and rear camera videos from vehicles - on any device in real-time.

### Easily Retrieve Recording

All recorded video is stored for you – allowing easy retrieval and analysis at any time

### Cloud Storage

Eliminate worrying about running out of space or accidentally deleting critical evidence.

### Real Time GPS Tracking

Track multiple vehicles on the map and view their location history
