

DO YOU KNOW THE PRICES OF YOUR COMPETITORS?

The market today is very transparent for customers to compare prices to make purchasing decisions, but it's not the same story for sellers. Indeed, it could be challenging for online sellers to obtain the most up-to-date price and product information to make the right data-driven business decisions.

That's the reason why we support retailers and manufacturers with real-time e-commerce market data as a service. The data is collected from big retailers, price comparison sites and marketplaces such as Amazon, Google Shopping, eBay, Idealo, and many more.

PRICE API ENABLES YOU TO:

- **Monitor your competitors' moves:** always be aware of the pricing strategies of your competitors and adjust your prices accordingly to remain competitive
- **Increase sales:** by setting competitive prices
- **Optimize your margins:** with the help of intelligent price increases at the right time
- **Reduce cost:** by saving time from manual competitor price monitoring

WHY PRICE API:

✓ REAL-TIME

The moment you request the data, we start collecting it so that you have the most up-to-date information.

✓ WORLDWIDE

Obtain data from sources in more than 30 countries.

✓ EU COMPLIANCE

Our crawling technology is legally compliant with EU laws.

✓ GOOGLE SHOPPING DATA

We offer data from Google Shopping, which is quite unique on the market.

✓ ONLY PAY FOR WHAT YOU NEED

Tailor your data request based on your needs & only pay for that.

✓ FLEXIBILITY

You define the country, platforms and frequency of your data queries.

✓ INTEGRATION SUPPORT

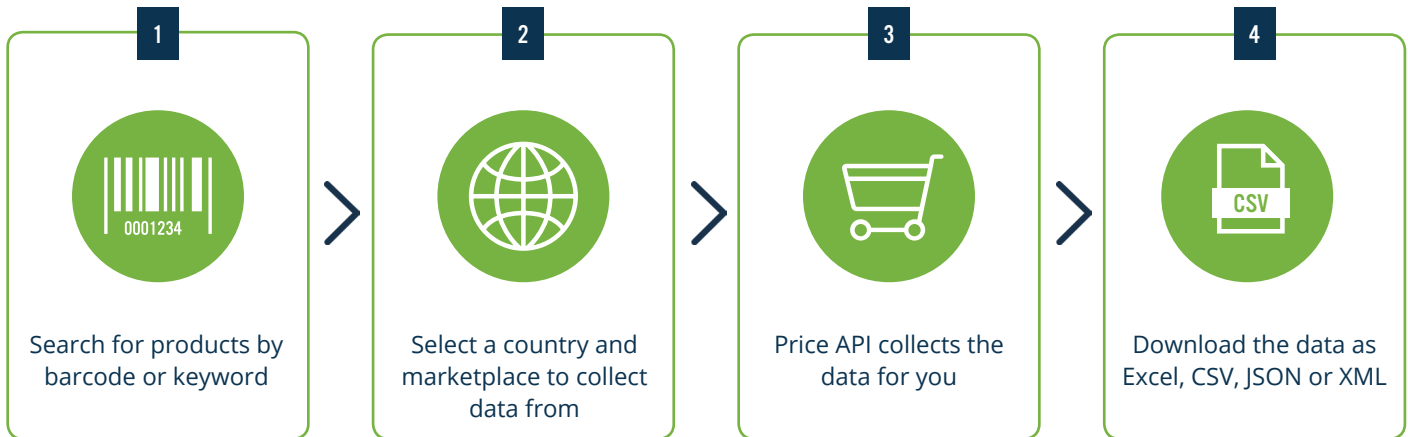

Hands-on technical support for any questions that you might have.

✓ HIGH QUALITY DATA

We offer data with > 98% matching rate across industries.

HOW DOES PRICE API WORK?

You can start using Price API to look up prices & products with 1,000 **credits** with a **FREE TRIAL** or contact us [here](#) for support if you need more information.
