

The Cisco AnyConnect Secure Mobility Client is required and provided by TMHP. I have included some steps below, but a more thorough explanation of how to obtain and install is provided by TMHP in the TMHP Connectivity Guide. You can find it here:

http://www.tmhp.com/TMHP_File_Library/EDI/TMHP%20EDI%20Connectivity%20Guide.pdf

Here is how to reach the software from within ElderSuite:

3

The screenshot shows a dialog box titled "Logon" with a key icon in the top-left corner. To the left of the dialog box is a red circle containing the number "3". The dialog box contains the following fields:

- Group: A dropdown menu with "TMHP_EDI_VPN" selected.
- Username: A text input field with a small icon on the right.
- Password: A text input field with a small icon on the right.
- Logon: A button centered below the input fields.

Last, it will open your web browser and navigate you to TMHP's website where you can download the software. Just input your credentials and it should give you access to download the software.
