

AURORA SERIES PRECISION HD STERILIZABLE COVER

INSTRUCTIONS FOR USE:

Aurora Series Precision HD Sterilizable Covers slide onto Aurora lightheads using a camera or counterweight providing sterile control for maneuverability of SKYTRON surgical lights.

Install cover over Precision HD Camera or counterweight. (See Figure 1)

Figure 1.

Ensure both engagement buttons have properly engaged the camera cover. Pull down on the camera cover after both buttons have engaged into place to ensure proper engagement. An audible “click” can be heard. (See Figure 2)

Figure 2.

WARNING

Only use with Skytron Aurora lightheads using a Precision HD Camera or counterweight.

Always be sure the sterile handle is properly secured before using the lighthead. An improperly installed handle could fall out, resulting in possible injury to the patient or surgical staff.

Handles are subject to normal wear and tear. Always examine the handles for wear or damage to ensure proper and safe operation with the surgical light. Avoid use if any deformities or imperfections are found.

RECOMMENDED STERILIZATION PARAMETERS:

The Skytron sterilizable camera covers for the Skytron surgical lights are made of heat resistant, impact resistant plastic that will stand up to the rigors of the automatic washer. The cleaner used should be of a mild alkaline type without active chlorine and must be thoroughly rinsed after prescribed cleaning time.

Replacement Parts:	None
Typical Dimensions:	Width: 3 5/8" [92mm] Length: 5 1/8" [130mm]
Weight:	.40lb [.18kg]

Steam Sterilization

132°C (270°F) : for 4 minutes
