

# SUPPLIER AUDIT MANAGER

This helpful tool forms part of our Supply Chain Management module allowing you to create, send, compile and automatically update supplier audit information as it is uploaded.

## FEATURES INCLUDE:

- ✓ Create customised audit templates according to your requirements, e.g. audit type, items, scoring, checklists, schedules and a corrective action response.
- ✓ Use our Foods Connected app on the go via your mobile device to quickly and easily complete an audit checklist and audit items for new audits.
- ✓ Share audits with suppliers, gather their responses and corrective actions and request more information on their responses through the system eliminating the need to send external emails.
- ✓ Update audit item statuses, including the ability to set an audit item as 'Awaiting Supplier Action' for corrective actions to be completed in the future.
- ✓ Complete view of comments and responses for each audit item from both customer and suppliers.
- ✓ View full audit reports with the option to export to PDF.
- ✓ Easily filter the audits you want and view in a summarised table with customisable columns and colour-coded statuses providing a quick overview of past and current audit activity.
- ✓ Create tailored audit reports with summarised charts of your recent audit outcomes and item categories, locations and types.
- ✓ Create widgets from the charts in your reports which can be used in the platform's customisable dashboard and shared with other company users.

Our Supply Chain Management module with each of its tools interconnects and integrates seamlessly with our Quality Management and Trading and Planning modules and are available on the Foods Connected single pane of glass platform.
