

Velo Hinge wall storage hook

Hook orientation and pivot tension

Tools Required:
- 5mm allen wrench
- Small hammer

Step 1: Open the Velo Hinge. Loosen 5mm pivot bolt 1-2 turns.

Step 2: Lightly tap top of 5mm pivot bolt to move threaded sleeve downward..

Note: By moving threaded sleeve downward, Velo Hinge will come apart with less effort in step 3.

Step 3: Disassemble the Velo Hinge. Once Velo Hinge is in separate pieces, remove the rubber coated hook from 1st position labeled in picture to left.

Step 4: Move rubber coated hook to 2nd position labeled in picture to left.

Step 5: Re-assemble Velo Hinge with hook located in position 2 and tighten pivot bolt to a medium snug.

Hinge orientation notes:

- Hinge pivots to the left in left photo. Head of pivot bolt is oriented on top.

- Hinge pivots to the right in right photo. Head of pivot bolt is oriented on bottom.
