

4G Adult Watch

User Manual

1. Check the ID number of this product in the label and check all accessories inside the box.
2. Install suitable 4G Nano-SIM card in the side of the watch. See installation instructions below for sim card below. **(Note: Sim card needed is a call, text and data sim card. SIM card cover must be locked by screw tightly after SIM card installed to ensure water proofing.)**

Use screwdriver to remove SIM cover on watch (if not already removed) Insert chip-side face upward, push inwards until spring retain.
To remove: push SIM in slightly to release spring retain

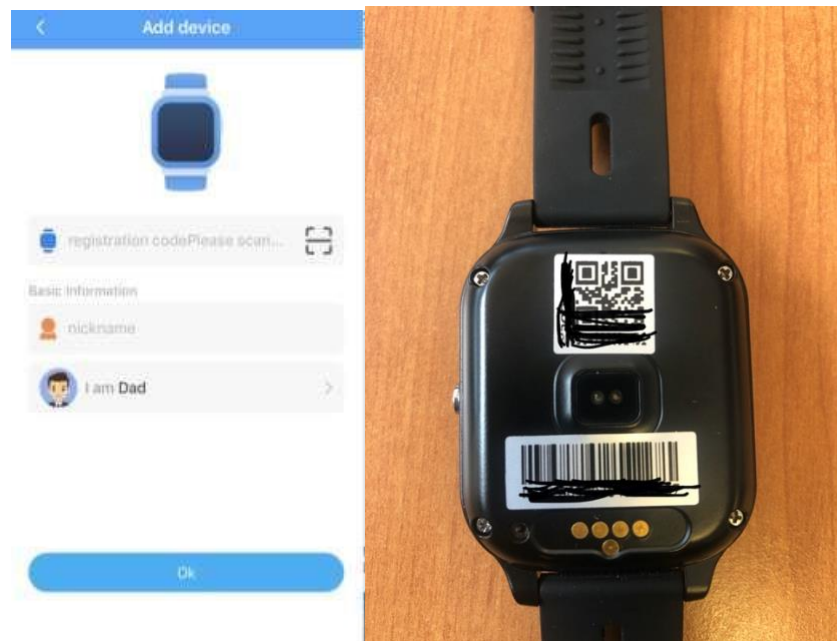

3. Download and Install “Aibeile Plus App via the **AppStore** or **Google Play Store**. (Option 2 Use phone camera to scan the following QRcode below> download and install.

4. Open App and click on the registration button on the bottom right corner, enter details and register account. (NOTE: If you are in Australia, you need to choose Area as “Asia and Oceania”. You also need to input correct email address to ensure you can reset password if needed.)

5. After successful registration, login to the account then go to More > Device list > Add device > Click scan icon to scan the QR code on the back of the GPS watch.

6. Power on - Hold the power key for 3 seconds to start the watch.
7. Power off - Option 1: Click the watch > More > Settings > off > OK or Option 2 by APP: Settings > Remote Shutdown.
8. Reboot - Press the power button for 15 seconds, the watch will reboot.
