

How to: Connect an iPhone to the school's wi-fi network

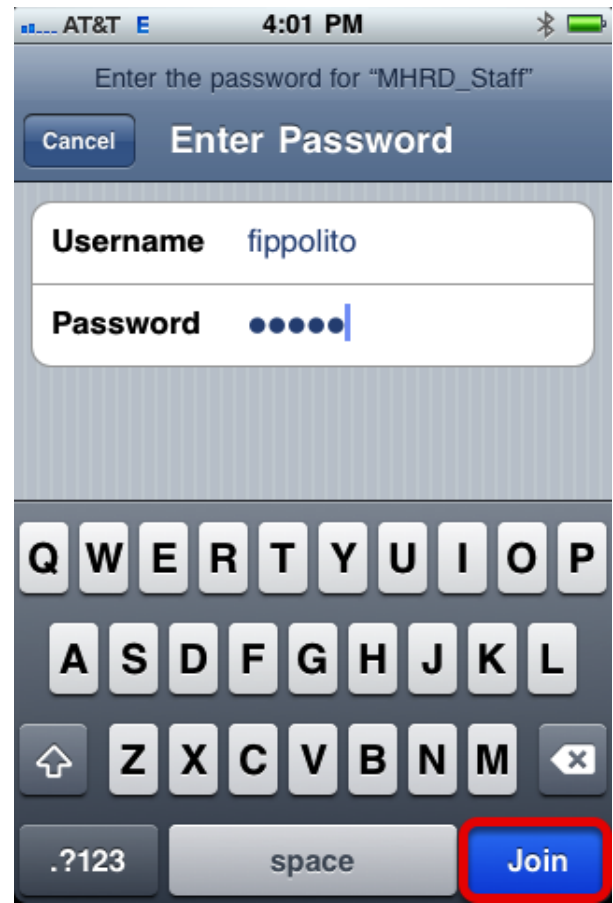

1. Select the network

On your iPhone, go to **Settings > Wi-Fi**, then select the **MHRD_Staff** network.

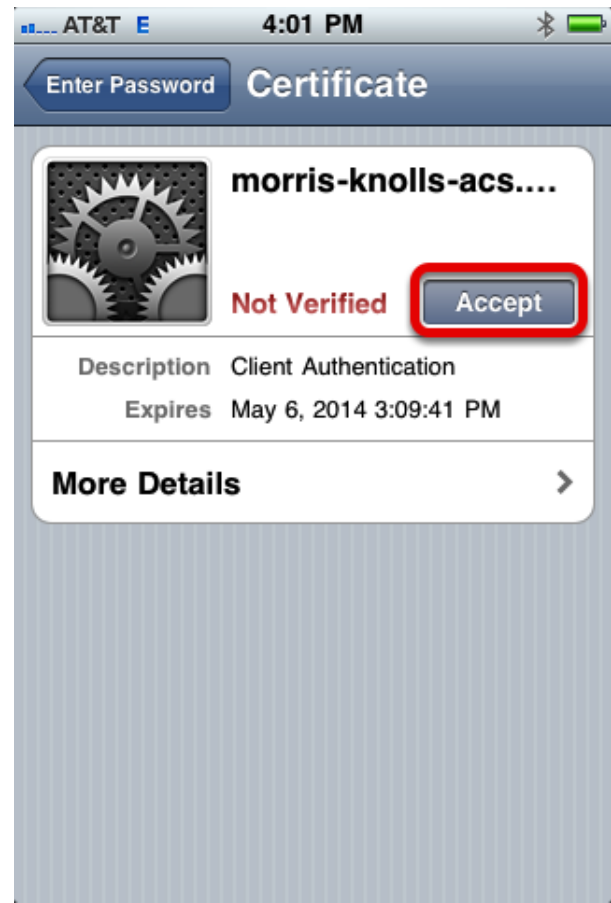

2. Enter your credentials

Enter the same username and password you use at school to log onto a Windows PC, then touch the **Join** button.

3. Accept the certificate

Touch the **Accept** button when the "morris-knolls-acs..." certificate appears.

4. Confirm your connection

A checkmark should now appear next to the **MHRD_Staff** network and the Wi-Fi icon should be visible at the top of your screen to indicate that you've successfully connected. Try surfing the web in safari or checking for email to confirm your connection.
