CRITICAL SOFTWARE UPDATE FOR ASI 10 NOW AVAILABLE

Version 2.3.3p1

Broadcast Electronics has released **new ASi 10 software**.

On February 16th, 2007, **version 2.3.3p1** was released. The software update is available from the Broadcast Electronics Customer Service website in the Registered User Login section on:
http://www.bdcast.com/support/

Please note there are two sets of instructions included in the downloaded zipped file. **It is imperative to follow the included instructions as some settings will be restored to factory default upon successful completion of the software upgrade.** The "Downloading Software Upgrade Files from the BE Website and Burning to CD Application Guide" includes a detailed step by step process to create the 2.3.3p1 upgrade CD from the downloaded file using a CD-RW drive. The "ASi 10 Software Upgrade, Upgrading to v2.3.3p1 Application Guide" will provide upgrade assistance after the upgrade CD has been created.

If you prefer to have a CD with Version 2.3.3p1 mailed to you, contact the RF Service department by phone on 217.224.9617 or e-mail **rfservice@bdcast.com** and request kit 979-6025-233P1.

Major change to the ASi 10 software from version 2.3.3 to version 2.3.3p1:

DUC II driver updated to eliminate non operational errors caused by erroneous PCI motherboard interrupts.

Thank you for choosing Broadcast Electronics!
