

eVineyard Registration

Step 1. browse to evineyardapp.com//lite and select register now

Ignore “Start 15 day free trial”, with the voucher code you can set up as a permanent license.

Enter your details and password for registration. Read the privacy notices and check when agreed.

Make sure to check mark that you have a voucher code.

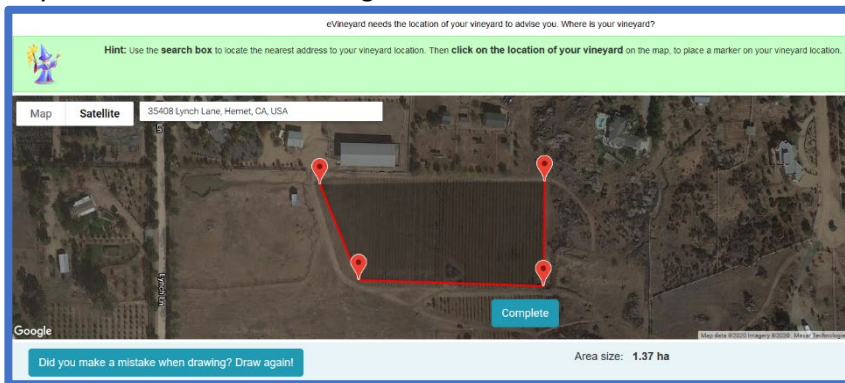

Enter voucher code here

I have voucher code

Your voucher code is provided below:

Make sure to provide eVineyard with the location that you will be setting up the Vinduino Station and draw an outline of the area your station will be covering.

eVineyard needs the location of your vineyard to advise you. Where is your vineyard?

Hint: Use the search box to locate the nearest address to your vineyard location. Then click on the location of your vineyard on the map, to place a marker on your vineyard location.

Map Satellite 25408 Lynch Lane, Hemet, CA, USA

Complete

Area size: 1.37 ha

Did you make a mistake when drawing? Draw again!

I understand and agree that eVineyard may use my provided personal data to provide eVineyard service, support, and can combine the provided personal data with data from other sources, to provide a complete user experience, in accordance with [Terms and Conditions](#).

I understand and agree that eVineyard may use my provided personal data for the purpose of sending me sales and commercial e-mails, and to improve those communications. I am aware that I may at any time request a copy of personal data that eVineyard possesses about me, as well as that I can at any time request deletion of my data, through a [Contact form](#). I acknowledge that my data will be processed by the vendor of eVineyard, and only if necessary, by a local eVineyard distributor, under the eVineyard data protection [Terms and Conditions](#).

REGISTER NOW

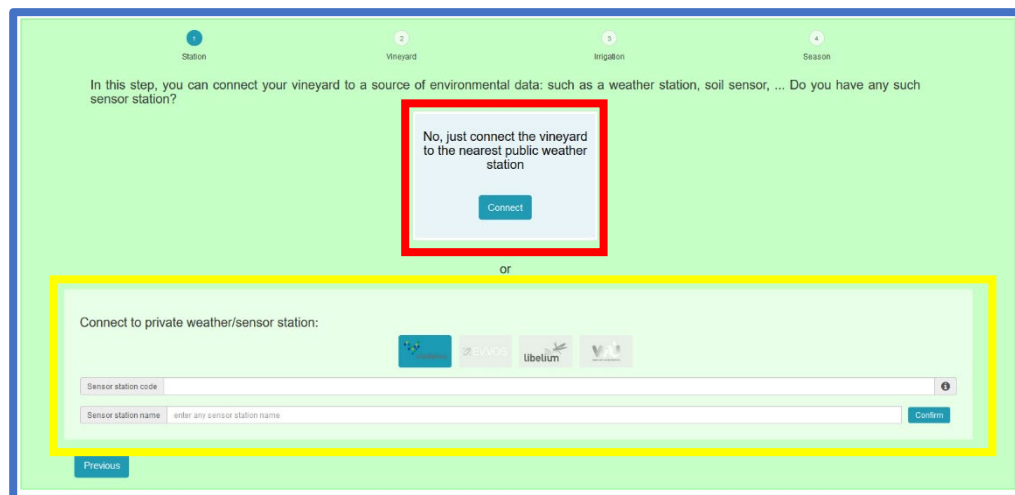

After providing the location and drawing the area you should now see a screen where you will register the station. **Make sure you have Vinduino selected and type the sensor station code we provided with you at the bottom of page.**

Do not click the connect button as shown in the image outlined in red.

In step 3 please make sure that the vine spacing (inter-vine distance, inter-row space) and canopy width is accurate, as this is used by the program for irrigation estimates.

Same for step 4 irrigation details.

Repeat if needed if more stations need to be added. eVineyard will then take you through a tutorial of the application.

1 Station 2 Vineyard 3 Irrigation 4 Season

In this step, you can connect your vineyard to a source of environmental data: such as a weather station, soil sensor, ... Do you have any such sensor station?

No, just connect the vineyard to the nearest public weather station

Connect

or

Connect to private weather/sensor station:

Sensor station code

Sensor station name enter any sensor station name **Confirm**
