

# Mobile App Configuration

## Android & iPhone

1. Open the "Play Store" or "Apple Store" application on your cell phone
2. In the search bar, enter "**UltraSync +**"
3. Click on the application "**UltraSync +**", it's logo looks like one of these:
4. Once the application is downloaded and installed, open the application named "**UltraSync +**"
5. Once the application is open on the home page, click the "**Add**" button located at the upper-right corner of your screen
6. Fill in the fields using the following information:
  - a. **Site Name:** The protected Location Name
  - b. **Description:** The description of the protected location
  - c. **Serial number:** The Serial number of the system (on the back of the control panel)
  - d. **Passcode:** 12345678
  - e. **User Name:** installer or User or User2 \*(Uppercase letter "U")
  - f. **PIN code:** 3275 (installer) or 1234 (User) or 2222 (User)
  - g. **Requires pin for login:** off (slider to the left)
7. Activate notifications by selecting "**Notifications services**" then select on "**Push Notifications**"
8. After the service has been activated, select "**Show Event Selection**", uncheck "**System**" and select "**Save**"
9. After saving the event selection, select "**back**", then the "**back**" button again and finally the "**Done**" button
10. You can now access the control panel using the mobile application. Simply tap the image associated to your protected site
